## Updates

---

**Date:** 1/8/2018      **Status:** Reviewed - Follow-up Required      **No Further Action:**

**Author:** Crowdus, Kory

**Notes:**

Condensate release and fire off location. Follow-up is required.

**Updated Volumes and Contaminant**   None at the time of this update

---

**Date:** 1/12/2018      **Status:** Inspection      **No Further Action:**

**Author:** Schiermeister, Robin

**Notes:**

Arrived on site at 11:20 on 1-10-2018. It was windy with wind speeds 5-10 miles per hour and temperatures near 5 degrees Fahrenheit. The fire went north off the well pad until it reached an access road to the landowner's field to the north. The contamination appears to have been cleaned up and stockpiled on site. An inspection will be needed in the summer to check for vegetation regrowth.

**Updated Volumes and Contaminant**   None at the time of this update

---

**Date:** 6/6/2019      **Status:** Inspection      **No Further Action:**

**Author:** O'Gorman, Brian

**Notes:**

Arrived on location at 9:52. 71 degrees F, Sunny, South wind 5-15 mph. Observed the area of concern and took photos. It appeared that the vegetation north of the flare had returned to its original growth stand. Did not notice any damaged and/or unhealthy plants. No further follow-up needed at this time. Photos added to the incident folder.

**Updated Volumes and Contaminant**   None at the time of this update
