Updates

Date: 1/8/2018 **Status:** Reviewed - Follow-up Required

No Further Action: ☒

Author: Crowdus, Kory

Notes:

Release impacted area off location. Further follow-up is required.

Updated Volumes and Contaminant None at the time of this update

Date: 1/12/2018 **Status:** Inspection

No Further Action: ☒

Author: Schiermeister, Robin

Notes:

Arrived on location at 11:16 on 1-9-2018. It was sunny with temperatures in the 30's. The release traveled east of the flare for about 50 feet. The contaminated material has been scraped and stockpiled, right by the newly scraped area. Further follow-up is needed in the spring to see if the contaminated stockpile has been removed and if vegetation is growing back.

Updated Volumes and Contaminant None at the time of this update

Date: 7/30/2018 **Status:** Inspection

No Further Action: ☒

Author: Schiermeister, Robin

Notes:

Arrived on site at 14:00 on 7-24-2018. It was sunny with temperatures in the 70s. The release went east of the flare pit impacting the snow. The responsible party scraped up the snow and disposed of it. Walked over to that area and saw some weeds and vegetation growing back. No further follow-up is necessary at this time.

Updated Volumes and Contaminant None at the time of this update
