Updates

Date: 1/8/2018 **Status:** Reviewed - Follow-up Required

No Further Action: ☒

Author: Crowdus, Kory

Notes:

Release impacted area off location. Follow-up is required.

Updated Volumes and Contaminant None at the time of this update

Date: 1/12/2018 **Status:** Inspection

No Further Action: ☒

Author: Schiermeister, Robin

Notes:

Arrived on site at 12:13 on 1-9-2018. It was sunny with temperatures in the 30's. The release went off the pad east of the flare. It appears to extend approximately 150 feet straight east. The contamination has been scraped and disposed of. A vegetation check will be needed in the spring.

Updated Volumes and Contaminant None at the time of this update

Date: 7/30/2018 **Status:** Inspection

No Further Action: ☒

Author: Schiermeister, Robin

Notes:

Arrived on site at 11:13 on 7-24-2018. It was cloudy with temperatures in the 70s. The release occurred east of the flare and mostly impacted snow. The responsible party scraped the area. Walked to the previously contaminated area, and saw healthy and actively growing vegetation. No further follow-up is necessary at this time.

Updated Volumes and Contaminant None at the time of this update
