Author: Crowdus, Kory

Notes:

Release impacted areas off location. Follow-up is required.

Updated Volumes and Contaminant None at the time of this update

Date: 1/12/2018 **Status:** Inspection

No Further Action:

Author: Schiermeister, Robin

Notes:

Arrived on site at 9:51 on 1-10-2018. It was windy with wind speeds 5-10 miles per hour and cold with temperatures around 5 degrees Fahrenheit.

Release was said to have gone off the well pad to the north. The area appears raked and the contamination stockpiled on site.

Further follow-up is needed in the spring to determine if vegetation is regrowing.

Updated Volumes and Contaminant None at the time of this update

Date: 7/31/2018 **Status:** Inspection

No Further Action:

Author: Schiermeister, Robin

Notes:

Arrived on site at 12:54 on 7-26-2018. It was sunny with temperatures in the 70s.

According to the report, the release went offsite to the north. Walked over to the northern edge of the pad and saw that the wheat field is green and actively growing.

No further follow-up is necessary at this time.

Updated Volumes and Contaminant None at the time of this update
