Oth Rel. Contaminant:

Date Inspected:

Clean Up Concluded:

Written Report Recd:

Risk Evaluation:

Immediate risk is low, as event was discovered and corrective actions implemented promptly.

Areal Extent:

Potential Env. Impacts:

No anticipated environmental impact to surface water, groundwater, or outside soils since release was contained within the berm at facility location.

Action Taken/Planned:

Vacuum truck arrived at 1600 hours and recovered approx. 21 bbls oil; this was transported to Prairie Disposal. Approx. 3 barrels mixed with facility dirt/gravel and could not be recovered via vacuum. Remaining oil and contaminated soil and gravel will be scraped up, put into roll off box for pick up. Site will be cleaned up after removal of contaminated soil and gravel, with new materials put down to replace removed contaminated mixture. Murphy switch will be replaced; overflow line will be heat taped and insulated. This entire task will be completed by the end of the day January 12, 2017. Other locations will be inspected for similar conditions and preventative measures taken where needed.

Wastes Disposal Location:

Prairie Disposal, Tioga, ND will collect roll off box and take contaminated mixture to their processing plant.

Other Agencies Involved:

Updates

Date: 1/12/2018 ***Status:*** Reviewed - Assigned to Other Agency ***No Further Action:***

Author: Crowdus, Kory

Notes:

Release remained on location, according to the report. NDIC retains oversight.

Updated Volumes and Contaminant None at the time of this update
