Written Report Recd:

Risk Evaluation:

Production fluids on location

Areal Extent:

Potential Env. Impacts:

Production fluids on location

Action Taken/Planned:

Pumper immediately isolated valves at wellhead, also did some gravel work to keep from spreading. Vac truck immediately came to suck up pooled fluids. HVAC will come back this Wednesday with the warmer weather and will finish sucking up contaminated gravel. Pumper was talked to about having plugs to cap off ends of plumbing and not just relying on valves.
