Oth Rel. Contaminant:

Date Inspected:

Clean Up Concluded: 11/1/2018

Written Report Recd: 11/9/2018

Risk Evaluation:

No immediate risk. The spill was contained on the facility site. A clean up crew was called in right away to begin clean up.

Areal Extent:

Potential Env. Impacts:

Low environmental risk, the spill occurred on top of a scoria pad, which is on top of a layer of impermeable clay. Very low chance that groundwater could be affected.

Action Taken/Planned:

Pumps were shut off immediately. The defective hose was removed, and replaced with a new one. Republic services was called in right away. All of the standing fluid was sucked up. All of the contaminated solid material is in the process of being removed down to the clay liner, and will be sent to an approved facility for disposal.

Wastes Disposal Location:

All fluids will be put back in to our system. All of the solid material will be sent to Republic Services in Alexander, ND.
