

Oil Field Environmental Incident Summary

Incident: 20181107145918 **Notice:** 11/7/2018 14:59 **Occurred:** 11/6/2018 15:15

Responsible Party: CONTINENTAL RESOURCES, INC.
Well Operator: CONTINENTAL RESOURCES, INC.
Well Name: BOXCAR BUTTE SOUTH FEDERAL 1-26H
Field Name: NORTH BRANCH
Well File #: 17483
Facility ID #:
County: MCKENZIE
Twp Rng Sec Qtr: 148 102 26
Location Description:
Submitted By: Justin Collins
Received By:
Contact Info: Justin Collins
 PO BOX 268870
 OKLAHOMA CITY OK 73126

Affected Medium: Topsoil
General Land Use: Pasture
Near. Occupied Bldg:
Nearest Water Well:

Type of Incident: Treater Popoff
Release Contained: No
Reported to NRC: No

	Spilled	Units	Recovered	Units	Followup	Units

Oth Rel. Contaminant:
Date Inspected:

Clean Up Concluded: 11/9/2018
Written Report Recd: 1/7/2019

Risk Evaluation:
 None

Areal Extent:
 Approx. 20' x 30' area off-location

Potential Env. Impacts:
 Vegetation, topsoil, well site soil

Action Taken/Planned:
 Returned treater vessel to normal operating conditions, mowed off-location vegetation, back-dragged affected area on-location.

Wastes Disposal Location:
 Indian Hills Disposal

Other Agencies Involved:
 US Forest Service, BLM

Updates

Date: 11/7/2018 **Status:** Reviewed - Follow-up Required **No Further Action:**

Author: DeVries, Taylor

Notes:

According to the incident report, the release was not contained to the well pad. Further follow-up is needed.

Updated Volumes and Contaminant None at the time of this update

Date: 11/13/2018 **Status:** Inspection **No Further Action:**

Author: Martin, Russell

Notes:

11/8/2018 at 13:22, on location. Met with cleanup personnel who were scraping wellpad scoria and cutting vegetation. Direction of pop-off went in a roughly northwest direction from the treater, impacting the wellpad scoria, pit flare, and vegetation within and outside the lease. Most of the stained vegetation is within the lease fence, but faint staining is visible on vegetation to about 30 ft away from the lease fence. Discussed work to be done on vegetation with cleanup personnel, their current plan is to keep cutting vegetation, up to the point where vegetation is visibly stained. Any remaining staining beyond that point should naturally attenuate. More follow-up required in the spring/summer of 2019 to confirm cleanup.

Updated Volumes and Contaminant None at the time of this update

Date: 9/6/2019 **Status:** Correspondence - Vegetation Check **No Further Action:**

Author: Suess, Bill

Notes:

The RP has been contacted to request verification of remediation at the site. Once the documents are reviewed the site will be revisited to assure proper revegetation.

Updated Volumes and Contaminant None at the time of this update

Date: 7/15/2020 **Status:** Inspection - No Action Required **No Further Action:**

Author: Suess, Bill

Notes:

Inspected the site on 7/14/2020. The spill remained within the gravel parking area. The impacted gravel has been removed and the excavation backfilled with fresh gravel. No adverse environmental impacts associated with this incident were observed. No further action is warranted.
