## Updates

---

**Date:** 11/13/2018      **Status:** Reviewed - Follow-up Required      **No Further Action:**

**Author:** O'Gorman, Brian

**Notes:**

According to the report, 0.5 barrels of oil was released and not contained. Further follow-up needed.

**Updated Volumes and Contaminant** None at the time of this update

---

**Date:** 11/14/2018      **Status:** Inspection      **No Further Action:**

**Author:** Stockdill, Scott

**Notes:**

Arrived on location 2:22 11/14/2018.

Spray from flare to west into field. No sign of free materials.

Check site in 2019 to ensure vegetation recovery.

**Updated Volumes and Contaminant** None at the time of this update

---

**Date:** 5/9/2019      **Status:** Inspection - Vegetation Check      **No Further Action:**

**Author:** Torgerson, Brad

**Notes:**

On 5/9/2019 at 10:17 am - Sunny and 44 Degrees F - Lightly stained vegetation was noted NW of the flare (stained area measured approximately 30 feet in diameter). Oil stained soil around flare berm. Severe soil erosion at NW corner of facility out into cropland. The soil erosion issue should be addressed.

**Updated Volumes and Contaminant** None at the time of this update

---

**Date:** 4/16/2020      **Status:** Correspondence - More Follow-up Required      **No Further Action:**

**Author:** Kaiser, Don

**Notes:**

Emailed company for incident status update on 4/16/2020.

**Updated Volumes and Contaminant** None at the time of this update

---

**Date:** 4/18/2020      **Status:** Correspondence - More Follow-up Required      **No Further Action:**

**Author:** Kaiser, Don

**Notes:**

Received email from company on 4/18/2020 as follows:

Hi Don, On behalf of Kraken, I am responding to your request for clean-up status of open sites. We will be working over the next month, as the weather warms up and vegetation growth emerges, to review each of the areas in your list and prepare an update for you. We will get back to you by the end of May with the update, and will provide you with updates during May, as possible based on reviews. Please feel free to contact me with any questions or requests for additional information.

My phone number is provided below.

Thanks,

Stacy

**Updated Volumes and Contaminant**    None at the time of this update

---

**Date:** 10/29/2020      **Status:** Inspection - Vegetation Check      **No Further Action:**

**Author:** Kaiser, Don

**Notes:**

Visited site on 10/20/2020. Impacted area had light snow cover. Impacted area had sparse vegetation in some areas. Visual of soil was not possible with snow cover. Photos are in incident report folder. Further follow-up is necessary to assure proper vegetation growth.

**Updated Volumes and Contaminant**    None at the time of this update

---

**Date:** 6/3/2021      **Status:** Inspection - Vegetation Check      **No Further Action:**

**Author:** Lund, Dylan

**Notes:**

This incident has been reassigned to Don Kaiser.

**Updated Volumes and Contaminant**    None at the time of this update

---

**Date:** 7/13/2021      **Status:** Inspection - Vegetation Check      **No Further Action:**

**Author:** Kaiser, Don

**Notes:**

Visited site on 7/8/2021. Took photos. Vegetation was sparse with many bare spots. Recommend follow-up for vegetation check.

**Updated Volumes and Contaminant**    None at the time of this update

---

**Date:** 5/17/2022

**Status:** Inspection - Vegetation Check

**No Further Action:**

**Author:** Wax, Pete

**Notes:**

On site Approximately 2:30 p.m. There are two releases on the pad at nearly the same location of the northwest corner into the bordering wheat field. One in 2012 and the other in 2018. On inspection, neither are still impacting the area north of the flare or treater. Instead there is a substantial amount of erosion off and around the pad that is burying the wheat field (digital images collected). To confirm, specific conductance was taken throughout the historical impacted area and background and they are identical, ranging from 0.89 ms to 1.28 ms. Close. Off site approximately 3:00 p.m.

**Updated Volumes and Contaminant** None at the time of this update
