According to the report, this incident was not contained. Further follow-up needed.

Updated Volumes and Contaminant None at the time of this update

Date: 11/26/2018 Status: Inspection No Further Action: ✓

Author: Schiermeister, Robin

Notes:

Arrived on site at 15:35 on 11-19-2018. It was cold with temperatures in the teens. The release misted off the well pad southeast of the flare. Talked to the responsible party representative dealing with the release who said that there is a work order to remove the stained snow. During the inspection, no contamination could be seen. The field appears to be used for agriculture. A vegetation inspection should be conducted next summer.

Updated Volumes and Contaminant None at the time of this update

Date: 6/11/2019 Status: Inspection No Further Action: ✓

Author: Crowdus, Kory

Notes:

On location 6/11/2019, at 2:01pm. Vegetation off location is green and growing. No further follow-up is required.
