## Updates

---

**Date:** 1/8/2019      **Status:** Reviewed - Follow-up Required

**No Further Action:** ☒

**Author:** Stockdill, Scott

**Notes:**

According to the incident summary, this spill impacted areas off of location. Follow-up is necessary.

**Updated Volumes and Contaminant**   None at the time of this update

---

**Date:** 1/23/2019      **Status:** Inspection

**No Further Action:** ☒

**Author:** Washek, Sandi

**Notes:**

Arrived onsite at 11:26am, weather was overcast with wind out of the west at 15 miles/hr. temperature of 27 degrees F.

GPS N48.11229 W 102.90441

The area of impact is located southeast of the flares. The vegetation on the ground appears burnt, about 25 wide by 60 feet long. Due to the direction of the wind and the flares going, the NDDoH inspector could not approach the burned area.

Additional follow-up will be needed for this site.

**Updated Volumes and Contaminant**   None at the time of this update

---

**Date:** 9/24/2019      **Status:** Inspection - Vegetation Check

**No Further Action:** ☒

**Author:** Crowdus, Kory

**Notes:**

On location 9/24/2019, at 11:44am. Vegetation is starting to recover in the area. There are still some bare areas nearest the flare. This may be due to heat from flare. Further follow up is required to check on vegetation.

**Updated Volumes and Contaminant**   None at the time of this update

---

**Date:** 10/29/2020      **Status:** Inspection - Vegetation Check

**No Further Action:** ☒

**Author:** Lund, Dylan

**Notes:**

Arrived on location at 1140 on 10/29/2020

Vegetation is starting to grow back east of flare but has not fully recovered. Another vegetation check is needed next summer. Photos were taken and can be found in report folder.

**Updated Volumes and Contaminant**   None at the time of this update

---

**Date:** 5/26/2021      **Status:** Inspection - Vegetation Check

**No Further Action:** ☒

**Author:** DeVries, Taylor

**Notes:**

Inspection Date: 5/26/2021

Arrived on location at 1730. Inspected the area next to the flare and it looks similar to the previous inspections. Another site inspection is recommended.

Photos were taken and can be found in the incident folder.

**Updated Volumes and Contaminant**   None at the time of this update

---

**Date:** 11/3/2021      **Status:** Inspection - Vegetation Check

**No Further Action:** ☒

**Author:** Suess, Bill

**Notes:**

This incident has been re-assigned to K. Crowdus.

**Updated Volumes and Contaminant**   None at the time of this update

---

**Date:** 7/26/2022      **Status:** Inspection - No Action Required

**No Further Action:** ☒

**Author:** Crowdus, Kory

**Notes:**

On location 7/26/2022, at 11:49am. Vegetation is growing in the impacted area. Some areas are a little sparse but should continue to fill in. No further follow-up needed.

**Updated Volumes and Contaminant**   None at the time of this update
