**Date:** 3/5/2019      **Status:** Reviewed - Follow-up Required

**No Further Action:**

**Author:** Crowdus, Kory

**Notes:**

Release impacted areas off location. Follow-up is required.

**Updated Volumes and Contaminant**   None at the time of this update

---

**Date:** 3/12/2019      **Status:** Inspection

**No Further Action:**

**Author:** Martin, Russell

**Notes:**

3/7/2019 at 18:49, on location. Met with site personnel familiar with incident and walked around pad due to the amount of activity onsite. Due to the high amounts of gas being burned by the flares onsite, grasses offsite just to the east of the flares do not have any snow cover, this appears to have lead to the small fire burning a patch of the grass. However, no visible staining on the ground or burnt fenceline. No further follow-up required at this time.

**Updated Volumes and Contaminant**   None at the time of this update
