Other

Oth Rel. Contaminant:

Date Inspected:

Clean Up Concluded:

Written Report Recd:

Risk Evaluation:

Minimal risk anticipated. The release has been stopped, completely contained within the tank berm and cleanup is in progress.

Areal Extent:

Potential Env. Impacts:

Minimal environmental impacts anticipated. The release has been stopped, it is completely contained within the tank berm and cleanup is in progress.

Action Taken/Planned:

The tank and line with the leak were isolated to stop further fluid from releasing. Vac trucks are being brought to location to pick up free fluid and impacted material. The valve will be replaced before the recycle line is put back into service and the cause of the valve split will be further investigated.

Wastes Disposal Location:

Gibson Disposal
