Affected Medium: Topsoil

General Land Use: Well/Facility Site

Near. Occupied Bldg:

Nearest Water Well:

Type of Incident: Valve/Piping Connection Leak

Release Contained: Yes - On Constructed Well Site

Reported to NRC: No

	Spilled	Units	Recovered	Units	Followup	Units
Oil	30	Barrels				

Brine

Other

Oth Rel. Contaminant:

Date Inspected:

Clean Up Concluded:

Written Report Recd:

Risk Evaluation:

Potential H2S vapor release from the oil being heated up due to sun exposure.

Areal Extent:

Potential Env. Impacts:

Contaminated soil on the wellsite.

Action Taken/Planned:

A company has been hired to clean up the current spill area which should take place in the next day or two. Our recommended/planned future action is to reinstall cattle guards around the well, have standard procedure in place for work-over crews, contractors or anyone else that may be manipulating well site equipment that could lead to a potential spill. In addition, we are looking into erecting a fence to keep out potential vandals and trespassers.

Wastes Disposal Location:

The waste will be disposed at a third-party disposal facility.
