Affected Medium: Well/Facility Soil
General Land Use: Cultivated
Near. Occupied Bldg: 120 Feet
Nearest Water Well: 250 Feet
Type of Incident: Equipment Failure
Release Contained: Yes - On Constructed Well Site
Reported to NRC: No

	Spilled	Units	Recovered	Units	Followup	Units
Oil						
Brine	20	Barrels	20	Barrels		
Other	1	Barrels	1	Barrels		

Oth Rel. Contaminant: Tank bottom solids

Date Inspected:
Clean Up Concluded:
Written Report Recd:

Risk Evaluation:
 Skin, Eyes, Vapor...all proper PPE was in place and no vapor was present

Areal Extent:
 Soils south of the tank battery and extending into retention area to the east of the tank battery.

Potential Env. Impacts:
 As this spill was contained on a lined location, the only water affected was rain water runoff and it will be sucked up and disposed of down our injection well onsite. All contaminated soils will be removed and disposed of and clean soils brought in to replace the soil removed.

Action Taken/Planned:
 Tanker and Hydrovac onsite immediately began sucking up contaminated water and soils and generally cleaning up the area. Spill barricades were set up in the ditch south of the road to limit further blending of the rain runoff and impacted soils into the water retention area. Water retention area will be emptied and water disposed of onsite. Impacted soils will be disposed of at an approved

solid waste facility (IHD, Tervita, Secure). Soils will be sampled and tested as required.

Wastes Disposal Location:

All recovered liquids will be disposed of onsite and impacted soils will be disposed of a an approved solid waste facility (IHD, Tervita, Secure).
