Written Report Recd:						
Risk Evaluation:						
None						
Areal Extent:						
South of location across the lease road approximately 90'x100'x80'x100'						
Potential Env. Impacts:						

#### Potential Env. Impacts:

Oil mist on ground cover, the impacted soils will be removed for disposal

#### Action Taken/Planned:

Spray that impacted the lease road was scraped up to prevent traffic from driving through the mist. Areas on location are being cleaned with a hydro vac. Areas misted off location will be scraped at a depth of a couple of inches. With the ground frozen this depth will be adequate to remove the mist of oil. Re-seeding of impacted areas will occur in the spring when conditions permit.

### Wastes Disposal Location:

Secure

**Other Agencies Involved:** 

### MHA. BIA

## **Updates**

Date: 2/7/2020 Status: Reviewed - Assigned to Other Agency No Further Action: 🗸

Author: Lund, Dylan

### Notes:

According to the incident report, location of the release is within MHA nation. Report forwarded to MHA environmental, BIA, and EPA.

Updated Volumes and Contaminant None at the time of this update
