4901 LBJ FREEWAY, STE 300

DALLAS TX 75244

Affected Medium: Topsoil
General Land Use: Pasture
Near. Occupied Bldg: 2895 Feet
Nearest Water Well: 2448 Feet

Type of Incident: Valve/Piping Connection Leak

Release Contained: No Reported to NRC: No

Spilled Units Recovered Units Followup Units

Oil 1 Barrels

Brine 45 Barrels 7 Barrels

Other

Oth Rel. Contaminant: N/A

Date Inspected:
Clean Up Concluded:
Written Report Recd:
Risk Evaluation:
No immediate risks

Areal Extent:

60' x 100' for location 15' x 600' for off location

Potential Env. Impacts:

There is the potential for some vegetation kill, however, this production water is pretty light and following the Forest Service's instructions, we will monitor throughout the spring and reseed vegetation at that time, if needed.

Action Taken/Planned:

Wells were shut in. A vac truck was dispatched to recover any lost fluid off location. A hydrovac truck was dispatched and was used to recover and fluid on location. A skidsteer was used to remove any contaminated soil on the location surface. Forest Service rep was brought on scene to instruct how they wanted to proceed.

Wastes Disposal Location:

Solids will be taken to Environmental Solutions Disposal and the liquids were taken to a public

disposal.

Updates

Date: 2/14/2020 Status: Reviewed - Follow-up Required No Further Action: ✓

Author: DeVries, Taylor

Notes:

According to the incident report, the release of production water was not contained to the well pad. Further follow-up is needed.

Updated Volumes and Contaminant None at the time of this update

Date: 3/2/2020 Status: Inspection - Vegetation Check No Further Action: ✓

Author: Suess, Bill

Notes:

Inspected the site on 2/27/2020. Clean up on the pad had been completed and off pad impacts looked to be minimal. The USFS wants to not conduct off pad remediation and just monitor. Will need a vegetation check in the spring.

Updated Volumes and Contaminant None at the time of this update

Date: 7/21/2020 Status: Inspection - No Action Required No Further Action: ✓

Author: DeVries, Taylor

Notes:

Inspection Date: 7/21/2020.

Arrived on site at 1610. Observed drainage to the south of the pad. The grass and other vegetation is growing very nicely. There are no signs of stressed or bare ground. No further follow-up is needed. Contact will be made with USFS to confirm closure.

Photos were taken and can be found in the incident folder.
