Updated Volumes and Contaminant None at the time of this update

Date: 2/20/2020 **Status:** Inspection - No Action Required

No Further Action:

Author: Torgerson, Brad

Notes:

On 2/20/2020 at 1:30pm - Sunny and 30 Degrees F - I visited the Whiting Oil and Gas Corp - Monson Federal 2-1H production facility. Met personnel on-site. Area west of flares on-location had been recently covered with scoria. According to representatives on-site, oil did not leave the location. No off location oil stains were noted. No further follow-up appears to be necessary.

Updated Volumes and Contaminant None at the time of this update
