Updates

Date: 12/18/2020 **Status:** Reviewed - Follow-up Required

Author: Kaiser, Don

Notes:

According to incident report, moisture from compressed air lines was dumped outside - found that there was oil in the moisture. Further follow-up is required.

Updated Volume: None at the time of this update

Date: 12/18/2020 **Status:** Inspection - More Follow-up Required

Author: Striebel, Ivana

Notes:

12/18/2020 - Onsite 12/16/2020 @ 10:25 am, overcast, 27° F, winds ~15 mph from the south. This site was originally visited due to a different General incident (#9466). The staining viewed at the time of inspection did not correlate to a transformer oil release. After speaking to the facility where the original transformer spill occurred, it turned out the oil staining in this area is due to dumping of a oil/water mix generated from the air compressor system used by this business. Employees have been emptying the barrel that is used to collect the oil/water mix out behind the building. A stormwater ditch is located approximately 30' from the dump site and a culvert is also close by. Pictures have been added to the incident file. Offsite at 11:21 am. Further action needed.

Updated Volume: None at the time of this update

Date: 6/16/2021 **Status:** Inspection - Vegetation Check

Author: Suess, Bill

Notes:

Inspected the site on 6/14/2021. The previous oil impacts have been remediated and new sod placed in one area. The vegetation in the rest of the flow path is recovering. More follow-up is needed to assure full vegetation recovery. No photos were taken due to a technical issue with the camera.

Updated Volume: None at the time of this update

Date: 9/17/2021 **Status:** Inspection - No Action Required

Author: Suess, Bill

Notes:

Inspected the site on 9/14/2021. No adverse conditions associated with this release were observed. No further action is warranted.

Updated Volume: None at the time of this update

Date: 5/10/2022 **Status:** Correspondence - No Action Required

Author: Suess, Bill

Notes:

Bill Suess sent a No Further Action letter dated May 10, 2022.
