Affected Medium: 03 - soil

Near. Occupied Bldg:

Type of Incident: generator trailer leak

Release Contained: Yes

Reported to NRC: Unknown

Contaminant: Motor Oil CAS# 25103-54-2

Volume of Release: 0.25 gallons

Duration of Release:

Agriculture Related: No

EPA Extremely Hazardous Substance: Unknown

Number of Fatalities:

Number of Injuries:

Cause of Incident:

Oil filter failure

Risk Evaluation:

No immediate risk

Potential Env. Impacts:

6 gal of contaminated soil was removed and replaced with clean soil. No other impact.

Action Taken/Planned:

Oil filter was replaced. Spill generated approximately 6 gal of contaminated soil.

Wastes Disposal Location:

Recovered waste is disposed of in a covered contaminated soil dumpster. When full it is removed and properly disposed of by G&G Disposal.

Other Agencies Involved:

Updates

Date: 12/21/2020 **Status:** Reviewed - No Action Required

Author: Suess, Bill

Notes:

Spoke with the RP. This incident was the result of a oil filter on a generator failing. Impacted soils have been removed and the site reclamation will be part of the wind farm project. Due to the size and nature of the release, no follow-up is needed.

Updated Volume: None at the time of this update
