Updates

Date: 12/20/2016 **Status:** Reviewed - Follow-up Required

Author: Schiermeister, Robin

Notes:

Lab results are needed for a full evaluation of the release. Further follow-up is needed.

Updated Volume: None at the time of this update

Date: 1/4/2017 **Status:** No Further Action Requested

Author: Suess, Bill

Notes:

Received a site investigation report. The site investigation did not identify any impacted soils at the site. The black soils encountered were determined to be organic in nature. Organic soils are common in agricultural areas.
