Dickinson ND 58601

Affected Medium: 03 - soil

Near. Occupied Bldg: 1443 Feet

Type of Incident: Vehicle Accident

Release Contained: Yes

Reported to NRC: Unknown

Contaminant: crude oil

Volume of Release: 70 barrels

Duration of Release:

Agriculture Related: No

EPA Extremely Hazardous Substance: No

Number of Fatalities: 0

Number of Injuries: 0

Cause of Incident:

A Tesoro transport driver was traveling on iced roads when the vehicle left the driving surface entering the road ditch. The truck over turned causing release of crude oil to ground.

Risk Evaluation:

none

Potential Env. Impacts:

Crude oil impacts to soil and snow. There are no impacts to surface or ground water.

Action Taken/Planned:

Local law enforcement, recovery vehicle, and spill remediation contractor were contacted and are onsite for support.

Wastes Disposal Location:

Permitted and approved waste disposal facility such as R360 Environmental

Other Agencies Involved:

NDDDES, Local Law Enforcement

Updates

Date: 12/21/2016 **Status:** Reviewed - Follow-up Required

Author: O'Gorman, Brian

Notes:

According to the report, 70 barrels of crude oil was released onto a road ditch due to a vehicle accident. A field inspector has been notified and will visit the site tomorrow. More follow-up needed.

Date: 12/22/2016 **Status:** Inspection

Author: Striebel, Ivana

Notes:

Location is north of Dickinson, on 33rd St SW, ~3 miles west of Hwy 22. On-site at 5:20 pm. Contractor was excavating and piling up contaminated soil for transport. Spill is located between two roads with a culvert that runs north. Culvert is located ~10 ft west of the spill. Spoke to Jake Tompkins (SM Fencing), who said that the road had been recently constructed, because of this the soil in the ditch where the spill happened had not yet been able to establish vegetation and the soil had not yet settled. When the semi tipped, it broke through the frost layer and infiltrated directly to soil where the fluids followed cracks and fissures in the soil. The contractors were following the spill through these cracks and fissures. At the time of inspection there were no standing liquids. Contractor was hoping to have the area cleaned up before the storm that was forecast for the upcoming weekend. Off-site at 6 pm.
