Hamilton ON L8N 1L1

Received By Info:

Contact Info: Judy McCurdy
398 Main St.
Hartland NB E7P 1C6

Affected Medium: 04 - water and soil

Near. Occupied Bldg: 200 Feet

Type of Incident: Drum Leak

Release Contained: Yes

Reported to NRC: Unknown

Contaminant: Non-regulated liquid calcium zinc solution

Volume of Release: 5 gallons

Duration of Release: 12 hours

Agriculture Related: No

EPA Extremely

Hazardous Substance: Unknown

Number of Fatalities: 0

Number of Injuries: 0

Cause of Incident:

Drum was loaded into 53' van trailer improperly and during transport the load shifted causing the drum to leak.

Risk Evaluation:

None

Potential Env. Impacts:

Soil and surface water. All impacted materials have been removed from site.

Action Taken/Planned:

The spill was contained via buckets from the spots dripping from trailer. Due to the remoteness of the site and availability of qualified contractors response did take some time. Once on site the contractors identified the spilt liquid and began remediation. The trailer was unpacked and contents cleaned as well as the pooling rain water surrounding the trailer was removed via a vacuum truck. Once all materials were removed soil excavation was completed in the areas the liquid had impacted surface soils.

Wastes Disposal Location:

The wastes were disposed of by Clean Harbors Inc. at their local disposal facility.

Other Agencies Involved:

Local Fire Department, Local Law Enforcement

Updates

Date: 5/26/2017 ***Status:*** Reviewed - Follow-up Required

Author: O'Gorman, Brian
