Affected Medium: 03 - soil

Near. Occupied Bldg: 400 Feet

Type of Incident: Pipeline Leak

Release Contained: Yes

Reported to NRC: No

Contaminant: Compressor Engine Oil

Volume of Release: 15 gallons

Duration of Release: 1 minutes

Agriculture Related: No

EPA Extremely

Hazardous Substance: No

Number of Fatalities: 0

Number of Injuries: 0

Cause of Incident:

WBI Energy employees were purging a natural gas transmission pipeline at our Tioga Transfer Station facility to do a by-pass and some liquefied compressor engine oil leaked out of the pipeline. All spilled oil was contained on-site within WBI Energy's facility.

Risk Evaluation:

None

Potential Env. Impacts:

None

Action Taken/Planned:

The spill was stopped as soon as possible. Within an hour of the spill, a vacuum truck was on-site to suck up any liquid oil. Most of the spilled oil pooled into an earthen pit on-site. Remaining oil-contaminated soil was loaded into a dump truck for transport to a local landfill.

Wastes Disposal Location:

Prairie Disposal Landfill

Other Agencies Involved:

Updates

Date: 5/25/2018 **Status:** Reviewed - Follow-up Required

Author: DeVries, Taylor

Notes:

According to the incident report, 15 gallons of compressor engine oil were released. Further follow-up is needed.

Updated Volume: None at the time of this update

Date: 6/4/2018 **Status:** Inspection

Author: Schiermeister, Robin

Notes:

Arrived on site at 13:45 on 5-31-2018. It was cloudy with temperatures in the 60s. Release occurred as they were purging an old pipeline, according to the report. Met with a party representative who said they hydrovacted and excavated the contaminated soil. The contamination was then disposed of at a facility south of Tioga. They appear to be putting in a new pig launcher. No staining or odor could be seen during the inspection. No further follow-up is necessary.

Updated Volume: None at the time of this update
