

Updates

Date: 9/14/2018 **Status:** Reviewed - Follow-up Required

Author: O'Gorman, Brian

Notes:

According to the report, 50 gallons of diesel fuel was released. More follow-up needed.

Updated Volume: None at the time of this update

Date: 9/18/2018 **Status:** Correspondence

Author: O'Gorman, Brian

Notes:

Spoke with Dallas Grossman of the Permits Program in the Water Quality Division. Their program is following this incident and will coordinate with the spill investigation program for assessment and remediation of the site. Three photos that were taken on 9/6/2018 were forwarded and added to the incident folder. A GPS location was also forwarded for a more precise definition of the release location. The coordinates are 47.488543, -100.711172 and the database has been updated accordingly.

More follow-up needed.

Updated Volume: None at the time of this update

Date: 9/20/2018 **Status:** Correspondence

Author: O'Gorman, Brian

Notes:

The Date of the Incident was changed from the 10th of September to the 6th of September because two NDDoH inspectors actually observed the release on the 6th, while conducting a stormwater compliance inspection for the City of Mercer 2018 Water Improvement Project. When they noticed the incorrect date, they contacted the Spills Program to correct it. The database has been updated accordingly.

More follow-up needed.

Updated Volume: None at the time of this update

Date: 9/21/2018 **Status:** Inspection

Author: Kannenberg, Derek

Notes:

Site is an active construction site. There appear to be some water system improvements being done. The dumpster where the fuel tank is located is rusted, and has an outflow hose attached. There is standing water in the dumpster, and there was a strong petroleum odor around the tank. The tank may have been moved since the time of incident, as the location of the tank does not appear to match the location from stormwater program pictures. There is one area of the site that appears to have possibly been excavated and filled, but it is unsure. Further follow-up required.

Date: 12/14/2020 **Status:** Correspondence - Vegetation Check

Author: Suess, Bill

Notes:

This incident is being reassigned to S. Stockdill. Follow-up is needed to assure proper remediation and revegetation.

Updated Volume: None at the time of this update

Date: 3/3/2021 **Status:** Inspection - No Action Required

Author: Stockdill, Scott

Notes:

Arrived on location 10:12 3/3/2021.

No sign of contamination or contaminants. Vegetation in area is doing well.

No follow-up is necessary.
