

# General Environmental Incident Summary

**Incident:** 5908

**Notice:** 11/19/2018

**Occurred:** 11/18/2018 1930

**DEM Incident No:**

**No Further Action:**

**Responsible Party:** Wildcat Trucking

**County:** McKenzie

**Twp Rng Sec Qtr:** 146 102 9

**Lat Long + Method:** 47.48103 -103.67650 Interpolation from map

**Location Description:** Approximately 1.2 miles west of French Creek Road and Red Wing Road Intersection

**Submitted By Info:** Juan Aguilar

PO Box 1389

Sidney MT

**Received By Info:**

**Contact Info:**

PO Box 1389

Sidney MT

**Affected Medium:** 03 - soil

**Near. Occupied Bldg:**

**Type of Incident:** Vehicle Accident

**Release Contained:** No

**Reported to NRC:** Unknown

**Contaminant:** Production Water

**Volume of Release:** 5 barrels

**Duration of Release:**

**Agriculture Related:** No

**EPA Extremely**

**Hazardous Substance:** Unknown

**Number of Fatalities:**

**Number of Injuries:**

**Cause of Incident:**

Driver slowed to check curve leading to downgrade. Upon entering curve truck slide on ice into ditch and tipped over.

**Risk Evaluation:**

None

**Potential Env. Impacts:**

Soil

**Action Taken/Planned:**

Decreased size of leaking hose. Sucked out and disposed of remaining water. Clean up area of spill.

**Wastes Disposal Location:**

**Other Agencies Involved:**

## **Updates**

---

**Date:** 11/19/2018      **Status:** Reviewed - Follow-up Required

**Author:** O'Gorman, Brian

**Notes:**

Release, due to a vehicle accident, was not contained, according to the report. Further follow-up needed.

**Updated Volume:** None at the time of this update

---

**Date:** 11/26/2018      **Status:** Inspection

**Author:** Schiermeister, Robin

**Notes:**

Arrived on site at 13:20 on 11-20-2018. It was sunny with temperatures in the 30s. The release went northeast of the road. The contamination appears to have impacted a 1 by 8 foot area, and appears to go down a few feet into the soil. This appears to go into a dry ravine. There was a yellow discoloration to the snow and the ground appeared soft where the contamination was. An EC probe was used to measure the levels of contamination and values as high as 26.2 mS were seen. A sample was taken at GPS points 47.481111, -103.676694 and will be tested for group 190 analytes. Talked to a Wildcat representative who said their insurance was handling the claim. Talked to their insurance who said they are actively looking for a cleanup service and said they will have a work plan soon. Further follow-up is needed to insure that proper clean up is being conducted.

---

**Date:** 11/30/2018      **Status:** Reviewed - Assigned to Other Agency

**Author:** Schiermeister, Robin

**Notes:**

Talked to US Forest Service since this appears to be on their land. They discovered the release went for a third of a mile into the drainage. Plans are still being discussed on what to do about the contamination in the drainage; however, the impacted soil on the top of the hill has been scraped.
