Affected Medium: 09 - other

Near. Occupied Bldg:

Type of Incident: Tank Overflow

Release Contained: Yes

Reported to NRC: Unknown

Contaminant: Oxy 87

Volume of Release: 1090 gallons

Duration of Release: 5 minutes

Agriculture Related: No

EPA Extremely

Hazardous Substance: Unknown

Number of Fatalities:

Number of Injuries:

Cause of Incident:

Driver hooked up to the wrong tank that was already full, as the driver started pumping off, he proceeded to do a walk around of his truck. When the driver was finishing up his walk around he noticed gas coming from the tank, he immediately shut the pump off. Driver ended up (according to the tank readings) spilling 1090 gallons of oxy87 inside the containment area that has a liner in it. Third party contactor was called to take remediation actions. There was no environmental impact caused by the spill

Risk Evaluation:

None

Potential Env. Impacts:

None

Action Taken/Planned:

Spill was contained in the containment area, which has liner inside of it, no soil was contaminated

Wastes Disposal Location:

Other Agencies Involved:

NDDDES
