Contact Info: Douglas Morgan

8150 N Central Expwy Ste 1550

Dallas TX

Affected Medium: 03 - soil

Near. Occupied Bldg: 1.8 Miles

Type of Incident: Tank Overflow

Release Contained: Yes

Reported to NRC: Unknown

Contaminant: Ethylene Glycol

Volume of Release: 21 gallons

Duration of Release:

Agriculture Related: No

EPA Extremely

Hazardous Substance: Unknown

Number of Fatalities: 0

Number of Injuries: 0

Cause of Incident:

Tank was filled above recommended level by Coldstream employee. When the excess was drained to secondary containment a hole was discovered in the secondary containment which caused a release of 21 gallons onto the facility soil.

Risk Evaluation:

no immediate risks to report at this time

Potential Env. Impacts:

Impacts to well facility scoria / soil

Action Taken/Planned:

Area of impact is approximately 6ft X 15ft X 1inch. The spill was contained by placing absorbent pad on the glycol. Coldstream is coordinating clean up by a 3rd party remediation company.

Wastes Disposal Location:

at an approved waste disposal facility

Other Agencies Involved:

Updates
