Affected Medium: 04 - water and soil

Near. Occupied Bldg: 0.2 Miles

Type of Incident: Pipeline Leak

Release Contained: No

Reported to NRC: Unknown

Contaminant: crude oil

Volume of Release: 13.5 barrels

Duration of Release:

Agriculture Related: No

EPA Extremely

Hazardous Substance: Unknown

Number of Fatalities: 0

Number of Injuries: 0

Cause of Incident:

High suction pressure that popped the PSV. The pressure relieved into the sump and the sump overflowed causing the oil to run out into the building and out the 2 inch vent pipe.

Risk Evaluation:

Potential risk of fire at the initial time of the incident.

Potential Env. Impacts:

Soils with some limited shallow standing water in vegetated areas.

Action Taken/Planned:

Remediation is currently occurring with temporary berms put in place. The offsite impact occurred to the southwest of the facility. Some of the impacted vegetated area have pockets of shallow standing water. Investigation is still ongoing.

Wastes Disposal Location:

An approved disposal facility.

Other Agencies Involved:

Updates

Date: 7/12/2019 **Status:** Reviewed - Follow-up Required

Author: Crowdus, Kory

Notes:

Release from a pipeline leak. Follow-up is required.

Updated Volume: None at the time of this update

Date: 7/30/2019 **Status:** Inspection

Author: Stockdill, Scott

Notes:

Arrived on location 1:33 7/30/2019.

No sign of remaining contamination. Area of backfilled soil to the west of the pipeline facility. A small raise in elevation prevented oil from contaminating nearby wetland.

More follow-up is necessary to ensure proper revegetation.

Updated Volume: None at the time of this update

Date: 8/20/2019 **Status:** Inspection

Author: Stockdill, Scott

Notes:

Arrived on location 3:02 8/20/2019.

Pipeline leak area has been excavated and soil stockpiled nearby. Contact responsible party regarding site cleanup.

More follow-up is necessary.

Updated Volume: None at the time of this update

Date: 8/26/2019 **Status:** Correspondence

Author: Stockdill, Scott

Notes:

Email from responsible party.

"I verified that the spill is now with the Long Term Remediation team. John Schenkewitz will be the point of contact for that location and will be working on remediation. We have had Earth Systems out to the site to help excavate and provide sampling and analysis and LTR will continue to provide work and remediation on that location.

.."
