

NON-COMMUNITY PUBLIC WATER SYSTEM REQUEST FOR LEAD AND COPPER SAMPLE SITE PLAN CHANGES
 NORTH DAKOTA DEPARTMENT OF ENVIRONMENTAL QUALITY
 DIVISION OF MUNICIPAL FACILITIES
 (5-2019)

Instructions: A valid reason must be provided for all proposed changes (e.g.; house gone, plumbing or service line replaced, homeowner unwilling to participate).
Replacement sites- A new site must meet the same Tier criteria as the old site it is replacing unless no sites are available which match. If no matching sites can be located, then the highest risk Tier site available must always be selected.*
Additional sites - All sites added to the plan must be of the highest risk Tier available.* If not replacing old sites simply leave that line blank.

Section I: Public Water System (PWS) Information

PWS Name:	PWS Number: (ex. ND1234567)	
PWS Authorized Signature:	Date:	Phone:

Section II: Site Information

Reason for Change	Sample Site Address	Interior Structure Plumbing (✓ all that apply)			Service Line (✓ one)	
		Lead Pipes	Copper Built 1983 to 1988	Copper Built BEFORE 1983	Lead	No Lead
	Old:					
	New:					
	Old:					
	New:					
	Old:					
	New:					

*Highest Risk
 ↓
 Lowest Risk

Tier 1 – A building with copper pipes and lead solder built 1983 to 1988, or lead pipes, and/or a lead service line.
 Tier 2 – A building with copper pipes and lead solder built before 1983.
 Representative – A building that does not fit into the above categories and contains materials which are representative of what is found throughout the distribution system. Can only be used if not enough Tier 1 and 2 sites present.

Make as many copies as necessary to provide all sample site changes. Send the completed form(s) to:
