## General Information

### Form SFN-19269 Application for A Solid Waste Management Facility Permit

Attached is application form, SFN 19269, for a North Dakota Solid Waste Management Facility Permit. This application form, along with the appropriate attachments, must be completed in order to obtain a permit pursuant to Chapter 23.1-08 of the North Dakota Century Code (NDCC) and Article 33.1-20 of the North Dakota Administrative Code (NDAC). **For your convenience, the application form and rules are also found on the Department's website at <https://deq.nd.gov/WM>.** Applicants should obtain a copy of these rules and related guidelines and be knowledgeable of the requirements prior to completing the application. Any permit issued by the Department will be based on the permit application information.

Please be sure that you address all information required on the form as well as all other information required under the Solid Waste Management Rules. Return this completed form along with the attachments and other information necessary to complete an application. In certain cases the Department may already have on file information from previous permits or facility evaluations. If the Department deems this material adequate, the applicant may reference these documents, the date they were submitted, and the date they were approved. In the event an application is not considered complete, or is inaccurate or deficient as outlined in the North Dakota Solid Waste Management Rules and Departmental guidelines, the Department will notify the applicant as promptly as possible so that the applicant has the opportunity to revise the submittal.

Permit preapplication provisions are identified in Section 33.1-20-03.1 of the North Dakota Solid Waste Management Rules. All applications for new solid waste management facilities must comply with the preapplication procedures. Submittal of an application for a new or modified permit requires the applicant to publish a Public Notice as specified in Section 33.1-20-03.1-02 NDAC. Department permit application review and action procedures are contained in Section 33.1-20-03.1-03 NDAC. This section also indicates which public participation processes are appropriate for new or modified applications. The Department consults with the North Dakota Geological Survey, the North Dakota State Water Commission, the Department's Division of Water Quality, and any other agencies necessary to help assess a site's suitability. Thus, a minimum of four copies of application materials is required. Additional copies may be necessary for other affected state or federal agencies and any local political subdivisions, etc.

A permit from the Department does not supersede local zoning authority or any other requirements of any political subdivision of the state. Coordination with any local zoning officials, local health officials, and any other necessary local, state or federal programs and agencies are necessary prior to submitting the application. Corroboration of such information is necessary to proceed with the application review. The Department encourages all applicants to work closely with local political subdivisions and local health officials, as well as the Department, throughout the permitting process.
