### **Emulsion Spill in Bowman County**

BISMARCK, N.D. – The North Dakota Department of Health (NDDoH) has been notified of an emulsion spill resulting from a flowline leak in Bowman County. The flowline is owned by Denbury Onshore, LLC. The spill was discovered approximately 8 miles southwest of Rhame on Monday, March 26, and was reported the same day. Oil emulsion is a mix of crude oil and produced water from a well.

Initial estimates indicate approximately 10 barrels of produced water and 2 barrels of oil were released, with 2 barrels of produced water and 6 gallons of crude oil impacting Spring Creek. Personnel from the NDDoH and North Dakota Industrial Commission are inspecting the site and will continue to monitor the investigation.

For more information, contact Bill Suess, North Dakota Department of Health, at 701.328.5216.
