## **Drinking Water Week highlights importance of safe drinking water**

BISMARCK, N.D. – The North Dakota Department of Environmental Quality - Division of Municipal Facilities encourages consumers to observe Drinking Water Week May 3-9, 2020.

The water community celebrates Drinking Water Week by recognizing the vital role drinking water plays in our daily lives. This annual event focuses on the value of water resources, recognizes the importance of having a safe and dependable supply of water now and in the future, and promotes water conservation. Tap water delivers public health protection, fire protection, support for the economy and the quality of life we enjoy.

“More than 92 percent of all North Dakotans receive drinking water from 317 community and rural drinking water systems statewide,” said David Bruschwein, director of the Division of Municipal Facilities. “The department works with local communities and water systems to ensure drinking water meets all health-based standards.”

Organizations involved in promoting Drinking Water Week include the North Dakota Department of Environmental Quality, the North Dakota Section of the American Water Works Association, the North Dakota Water and Pollution Control Conference, the North Dakota Chapter of the American Public Works Association, the North Dakota Water Environment Association and the North Dakota Rural Water Systems Association.

For more information on Drinking Water Week, contact David Bruschwein or Greg Wavra, Division of Municipal Facilities, at 701-328-5211, or visit <https://drinktap.org/>.
