Three State Revolving Fund loans awarded for improvement projects

BISMARCK, N.D. – The North Dakota Department of Environmental Quality (NDDEQ) awarded loans for water and sanitary and storm sewer projects to two communities and a water district through the State Revolving Fund Programs in March and April.

- **Northwood** received a \$7,000,000 Clean Water State Revolving Fund loan to improve portions of the sanitary sewer system and install a citywide storm sewer system. This will correct drainage issues throughout the city and improve the sanitary sewer system, ensuring the safe transmission of sanitary sewer and stormwater for the residents.
- **Davenport** received a \$527,000 Drinking Water State Revolving Fund (DWSRF) loan towards demolishing the existing underground storage reservoir, construction of a new reservoir with a booster pump station, improving the drinking water distribution system, and control upgrades. This project will provide safe storage and supply of water for the residents.
- **North Prairie Regional Water District** received a \$3,825,000 DWSRF loan to replace 13.5 miles of transmission line from Logan to Velva, rehabilitate the existing booster station and increase storage capacity. The project will provide safe storage and distribution of water.

The U.S. Environmental Protection Agency provides part of the SRF Programs funding, which offers below-market interest rate loans to political subdivisions for financing projects authorized under the Clean Water Act and Safe Drinking Water Act. SRF programs operate nationwide to provide funding to maintain and improve the infrastructure that protects our vital water resources.

Loans are awarded to projects that are listed on the NDDEQ project priority list based on project eligibility and ability to repay. Please contact the NDDEQ regarding specific detail on any of the projects mentioned above.
