Three Clean Water State Revolving Fund loans awarded

BISMARCK, N.D. – The North Dakota Department of Environmental Quality (NDDEQ) awarded three loans for sanitary and storm sewer projects to three entities through the Clean Water State Revolving Fund (CWSRF) Program in March.

- **Elgin** received a \$340,000 CWSRF loan towards replacing a sanitary sewer main and manholes with a new sanitary sewer main. This project will improve system reliability for customers.
- **Metro Flood Diversion Authority** was awarded a \$51,634,000 CWSRF loan towards an in-town flood protection system. The project will upgrade sixteen storm lift stations throughout the City of Fargo, which are required components of the comprehensive flood protection for the Fargo-Moorhead metro area. This project will ensure the safe transmission of stormwater for the residents.
- **Strasburg** received a \$1,326,000 CWSRF loan towards the construction of three lagoon cells for wastewater treatment and the addition of 3,600 linear feet of force main and modifications to the lift station. This project will provide for the safe reclamation of sanitary sewer water.

The U.S. Environmental Protection Agency provides part of the CWSRF Program funding, offering below-market interest rate loans to political subdivisions for financing projects authorized under the Clean Water Act. CWSRF programs operate nationwide to provide funding to maintain and improve the infrastructure that protects our vital water resources.

Loans are awarded to projects listed on the NDDEQ project priority list based on project eligibility and repayment ability. Please contact the NDDEQ at ndsrf@nd.gov regarding specific detail on any of the projects mentioned above.
