OFFICIAL BULLETIN

*Official Publication of the
North Dakota Water and Pollution Control Conference*

Conference Issue

Established 1935

VOL. 102

July-September 2014

NOS. 7-9

PRESIDENT - Dean Sletten

PRESIDENT-ELECT - Dan Jonasson

VICE PRESIDENT - Seth Lynne

DIRECTORS - Joe Ferguson, Tracy Eslinger, Mike Berg, Wei Lin

ASSOCIATE DIRECTOR - Michael Quamme

SECRETARY-TREASURER - Mike Brisben

The objectives of this Conference shall be: the advancement of the knowledge of design, construction, operation and management of water and wastewater systems; the promotion and encouragement, through annual meetings or otherwise, of an exchange of information and experience among its membership; the promotion and encouragement of the protection of public health and improved environment through the construction and efficient operation of water supply and wastewater treatment facilities; and the promotion of water and wastewater system operator education and certification programs.

*Article II of the Constitution of the
North Dakota Water and Pollution Control Conference*

NDWPCC President's Letter

by Dean Sletten, North Dakota Water and Pollution Control Conference President

Dear Conference Members and Friends:

The annual North Dakota Water and Pollution Control Conference is jointly sponsored by the North Dakota Water and Pollution Control Conference, the North Dakota Water Environment Association, the North Dakota Section of the American Water Works Association, the North Dakota Chapter of the American Public Works Association, and the North Dakota Chapter of the North American Stormwater and Erosion Control Association. On behalf of these sponsoring organizations, I invite you to attend the 86th Annual Conference on October 14, 15, and 16 at the Holiday Inn in Fargo.

This year's conference offers technical sessions presented by the sponsoring organizations, a vendor hall exhibit, municipal tours, service projects, a water taste test contest, a student and Young Professional social and poster competition, and an awards banquet to honor the efforts of members of the sponsoring organizations. Most importantly, the conference offers numerous opportunities to network and socialize with your peers.

In addition, a pre-conference workshop on Confined Space Safety Training will be held on Monday, October 13, 2014 at Fargo Public Works.

The success of the conference depends on member involvement. I encourage each of you to get involved with one of the sponsoring organizations and help make this and future conferences a success. I hope to see you in Fargo.

Sincerely,
Dean Sletten, President
North Dakota Water and Pollution Control Conference

**You need a specialized
water solution.
We have very specialized
water engineers.**

When you need a water engineering solution, you need Ackerman-Estvold. Our engineers are experts in their specialty, giving your project the very best thinking. That expertise allows us to design the right solution for water distribution, water & waste water treatment, sanitary sewer, and storm sewer systems. **We're setting the standard for engineering in North Dakota.**

Revised Total Coliform Update

by Jeni Walsh, North Dakota Department of Health

The Revised Total Coliform (RTCR) published last year becomes effective for all public water systems April 1, 2016. The Drinking Water Program has been and will continue to work toward implementing the RTCR and providing training and updates to water systems.

Training sessions will be presented at the 2014 Fall Conference in Fargo and also at the 2015 Spring Operator Training classes in Bismarck. Additional mailings and other training efforts will continue through 2016.

The Drinking Water Program has participated in Environmental Protection Agency (EPA) and the Association of State Drinking Water Administrators (ASDWA) training sessions that have covered details about the requirements and guidance on implementing the RTCR. We will continue to learn about the RTCR as more material is made available and will pass that information along to the water systems.

The major change in the regulation from the current Total Coliform Rule (TCR) is the requirement to conduct assessments of the water system to identify sanitary defects when total coliform is detected in the distribution system multiple times in one month. Whereas the TCR issues a Maximum Contaminant Level (MCL) violation, the RTCR will require the system to do an assessment and undertake corrective action(s). A Treatment Technique (TT) violation will be issued only if the assessment or corrective action(s) are not completed. Acute MCL violations will continue to be issued when *E. coli* is confirmed to be present in the water system samples. In addition to the Acute MCL, the RTCR will also require an assessment and corrective action(s) to be completed.

We have begun the process of developing procedures

and forms for conducting the required assessments, sampling plans and start-up procedures based on EPA's guidance. In addition, we will be developing a notification and tracking procedure to initiate and document the assessments and corrective action(s). We are working to develop these forms and will have draft procedures in place by the spring of 2015. This will allow us to begin implementing the assessments and start-up procedures parallel to the current TCR requirements to help train water systems and our staff on the new requirements. Compliance during this period will continue according to the current TCR, although water systems will be encouraged to complete the assessments and any identified corrective action(s).

With the implementation of the RTCR, **ALL WATER SYSTEMS WILL MOVE TO MONTHLY MONITORING** for the months in which they are open, regardless of classification. The monitoring requirements for number of samples under the RTCR are essentially the same as under the current TCR for routine and repeat samples (although only three repeat samples are required per positive sample). However, the current requirement of collecting the "next five" routine samples the month following the positive sample will be removed.

The staff at the Drinking Water Program is working now on the Special Primacy Requirements package to EPA and the Full Primacy application package that is due early next year. We will be sending information packets to all systems throughout the next year and a half to make sure everyone is aware of the changes brought on by the RTCR.

More information regarding the details of the RTCR can be found on the EPA website:

http://water.epa.gov/lawsregs/rulesregs/sdwa/tcr/regulation_revisions.cfm or the

RTCR Quick Reference Guide at:

Membership Application

Step 1 Decide which type of membership works best for you (Individual or Group)

INDIVIDUAL MEMBERSHIP

Available to any official or employee of a governmental agency, manufacturer, supplier, contractor, or consulting firm that is actively engaged in the field of public works.

☐ \$164 USD/CAN

☐ *Never been a member? Get your FIRST YEAR of individual membership at HALF-PRICE! (Just \$82 USD/CAN each!)*

GROUP MEMBERSHIPS

Groups will receive one consolidated renewal notice with a member roster attached. Members may be added or dropped from the roster throughout the year, if necessary.

Public Agency Group Membership

Available to any federal, provincial, state, local or other public agency concerned with public works. The number of individual memberships and the annual fee for an agency are based on the population served by the agency. When joining as an agency, each member saves \$26 USD/CAN on annual membership dues.

- **State or Provincial Agencies**—Number of rostered members and annual dues for the group would be determined using the "Population Served" row representing 10% of total state population. (Please also mark applicable category and provide names and contact information for all those who should be included on the group roster.)
- **County Agencies**—Number of rostered members and annual dues for the group would be determined using the "Population Served" row representing 50% of total county population. (Please also mark applicable category and provide names and contact information for all those who should be included on the group roster.)
- **Special Districts**—Number of rostered members and annual dues for the Group would be determined using the "Population Served" row representing 20% of total district population. (Please also mark applicable category and provide names and contact information for all those who should be included on the group roster.)
- **All others**—Refer to row representing total population served by the agency. (Mark the category representing total population served by the agency and provide names and contact information for all those who should be included on the group roster.)

Population Served	Number of Rostered Members Covered*	Annual Dues USD/CAN
<input type="checkbox"/> 0 – 10,000	2	\$ 276
<input type="checkbox"/> 10,001 – 25,000	4	\$ 552
<input type="checkbox"/> 25,001 – 50,000	6	\$ 828
<input type="checkbox"/> 50,001 – 100,000	10	\$1380
<input type="checkbox"/> 100,001 – 300,000	16	\$2208
<input type="checkbox"/> 300,001 – 500,000	20	\$2760
<input type="checkbox"/> 500,001 – 1,000,000	26	\$3588
<input type="checkbox"/> More than 1,000,000	30	\$4140
<input type="checkbox"/> Federal Agency	50	\$6900

Corporate Group Membership

Available to any non-governmental entity that furnishes public works services or products, including privately held or incorporated utilities. There are three levels of corporate group membership: Heritage, Prestige, and Crown. Please select a membership level and provide names and contact information for all those who should be included on the group roster.

Corporate Membership Level	Number of Rostered Members Covered*	Annual Dues USD/CAN
<input type="checkbox"/> Heritage	2	\$ 403
<input type="checkbox"/> Prestige	10	\$1683
<input type="checkbox"/> Crown	40	\$7991

*You may designate additional members for \$138 USD/CAN each.

Fee schedule effective through December 31, 2012

Step 2 Dues, Member Information, and Payment

Membership is for one year and will begin upon receipt of dues payment. Purchase orders are acceptable, but members will not receive benefits until receipt of payment. MasterCard, Visa and American Express are accepted – please provide credit card number, expiration date, and cardholder name. If billing address is outside North Dakota, please contact APWA for information regarding chapter dues.

APWA membership dues are not deductible as a charitable contribution but may be deductible as an ordinary business expense, subject to IRS limits. APWA does not designate the use of membership dues for lobbying or advocacy efforts, however eight percent (8%) of our total operating budget is allocated towards advocacy-related programs, including staff salaries. Please consult your tax professional with regards to eligible ordinary business expenses.

Send remittance to: American Public Works Association, PO Box 802296, Kansas City, MO 64180-2296
(Credit card payments may be faxed to: 816-472-1905 or 816-472-1610)

Include the full name, job title, company/agency, mailing address, phone, fax, and e-mail (if available) for each person membership is to cover.

Questions? Contact a membership specialist at 800-848-APWA or membership@apwa.net.

APWA Headquarters: 2345 Grand Blvd, Suite 700, Kansas City, MO 64108-2625

City of Fargo's New Ground Storage Reservoir and High Service Pumping Station

Dustin Dale P.E., AE₂S, and Mark Peterson, City of Fargo

The City of Fargo, like many other North Dakota cities, is growing rapidly. According to the U.S. Census Bureau, Fargo's population increased from 90,599 residents in 2000 to an estimated 113,658 in 2013. Specifically, the south side of town has experienced explosive growth within the last few decades. This growth was beginning to stretch the limits of the centrally located Water Treatment Plant (WTP) and existing high service pumping station (HSPS). City leaders began to question whether the needed water pressure and volume could continue to be delivered to new development areas in the south as the city continued to expand.

The City of Fargo retained Advanced Engineering and Environmental Services, Inc. (AE₂S) to develop a Distribution System Master Plan (DSMP) to evaluate the city's current drinking water infrastructure, as well as look at the city's future needs. The engineering team created a hydraulic model as part of the DSMP to identify system deficiencies and possible solutions. The DSMP identified that a new 36-inch transmission pipeline, Ground Storage Reservoir (GSR), and remote high service pump station on the south end of the city could resolve current water concerns, as well as provide the flexibility to serve a continually growing population.

GSR Designed for Current and Future Growth
AE₂S, in association with Black & Veatch (B&V) developed a plan for the new GSR and Pump Station to allow for minimum maintenance, a long life, and provide for operational flexibility. They determined a 5.5 million gallon GSR should be constructed on a City-owned section of land in south Fargo. The land has room for the City to potentially build a future satellite WTP and a second 5.5 million gallon GSR as demands warrant in the future.

The 178-foot diameter GSR is an AWWA D110 Type III tank, constructed utilizing 31-foot-tall precast concrete walls containing an embedded steel diaphragm. After the walls were set vertically, wires were wound horizontally around the tank, keeping the walls in permanent compression. Poor soil conditions led to the GSR being placed on steel piles to prevent both settling and uplift pressures. The tank is buried halfway beneath ground level to keep a lower profile because the GSR and pump station are adjacent to residential and commercial development. The lower profile is also aided by the GSR's flatter roof design, which is supported on columns inside the tank. The tank contains active mixing to aid in water circulation, decrease stratification, and prevent ice build-up during winter months.

The GSR is filled through a dedicated 48,000-foot, 36-inch transmission pipeline fed from the city's existing HSPS. Operators are able to remotely control the rate of fill of the GSR from the WTP by modulating a pressure-sustaining valve located adjacent to the GSR. The pump station is used to pump finished water to areas generally south of I-94. This arrangement has helped the city provide adequate pressures and better maintain water tower levels throughout its distribution system.

Pump Station Designed to Grow with City

The pump station was designed and constructed with a capacity of 18 million gallons per day (mgd). This is achieved through four vertical turbine pumps, with room for two additional pumps. The design team included provisions to allow for multiple future expansions to 28 mgd, 40 mgd, and ultimately 60 mgd to meet future demands. Chemical feed systems were included in the pump station to allow dosing of disinfection chemicals into the water as it passes through the pump station.

HoustonEngineering Inc.

Bismarck, ND 1201 Airport Road 701-258-9700 800-932-8759	Fargo, ND 1917 1st Ave N 701-293-5511 800-437-4362
---	---

www.nwws.biz

The pump station utilizes a geothermal system for heating and cooling, which helps to minimize the city's environmental impact and reduce operating costs. The project team also considered a solar panel system, but that option was not selected due to cost effectiveness. The exterior of the GSR and pump station were designed to match the existing WTP to help the city consistently brand its water infrastructure. The design also includes a large masonry screen wall around the standby power generator to enhance the aesthetic appeal and minimize noise impact for nearby residents

From an electrical standpoint, the pump station was designed to be fed from two separate electric service feeders and also includes a 1500-kW, walk-in style generator, increasing the redundancy and reliability of the facility. Additional electrical items include variable frequency drives and premium efficient motors designed to be extremely reliable and of adequate size to handle the projected expansion schedule of the facility, while at the same time being energy efficient.

The pump station is equipped with office and lab areas to provide operators the ability to perform limited sampling and full SCADA controls of either the pump station or the WTP through the SCADA system. The pump station is operated remotely from the WTP, so it does not require an operator onsite, but staff does make a minimum weekly

walk-through. Due to the distance of the pump station from the WTP, there is also a maintenance area to house snow removal and lawn care equipment, as well as a work bench and tools for maintenance staff to perform simple repairs.

Project Success

The nearly \$15-million GSR and pump station project began construction in fall of 2010 and was functionally completed in July 2012. Since being brought online, the city has noticed increased turnover in the distribution system's water towers, which results in reduced water age and improved chlorine residual.

Added Benefit

Since the GSR and Pump Station came online, an added benefit has been improved performance at the WTP. Due to the increased finished water storage capacity, the number of flow changes through the WTP has been cut nearly in half. This has resulted in fewer plant upsets and a more consistently treated water quality leaving the plant. This is accomplished by using the GSR as a balancing tank to store excess water in times when the distribution system demand is less than the WTP production and as a source for the distribution system when distribution system demands are greater than WTP production.

PAVEDRAIN® *Sustainable Stormwater Solutions*

The PaveDrain® system is an aesthetically pleasing Permeable Articulating Concrete Block Mat (P-ACB/M) that provides installation ease and flexibility to meet current and future stormwater management regulations. The PaveDrain® system provides infiltration, storage, detention, conveyance and a paving surface all in one. When combined, these features allow for a reduction or elimination in stormwater infrastructure costs while minimizing environmental impact. The PaveDrain® system is designed to be a critical component of Low Impact Development (LID) allowing for the infiltration of stormwater runoff.

Features and Benefits of the PaveDrain® System

- Mattress or Hand-Placed Installation
- Unprecedented Infiltration Rate
- AASHTO HS-20 & H-20 Load Rating
- Minimal Maintenance
- Internal Storage Chamber
- Regional Manufacturing Benefits Local Economies

Water Environment Federation National Representative

2014 North Dakota Water and Pollution Control Conference Welcomes Paul Bowen.

*Paul Bowen, Vice President
of Water Environment
Federation*

Paul is currently the Director of Sustainable Operations for The Coca-Cola Company. In this role, he leads the environmental sustainability program across the quality and technical organizations of The Coca-Cola Company. He is responsible for delivering on company commitments in the water and energy/climate spaces, and for embedding environmental sustainability across all Coca-Cola System operations. He serves as a technical expert for developing water reuse with corporate quality standards and as a SME on water and wastewater treatment issues.

Prior to his position with The Coca-Cola Company, Paul was an Assistant Professor in the School of Civil Engineering & Environmental Science at the University of Oklahoma and Vice-President and Senior Staff Consultant for Metcalf & Eddy.

A Water Environment Federation (WEF) member since 1977, Paul has held multiple leadership and committee roles within WEF. He currently serves as the Vice-Chair of the Committee Leadership Council. He has served on the Program Committee as both chair and vice chair, as well as served as a member and chair of the Residuals & Biosolids Technical Symposium,

Industrial Wastes Technical Symposium and the Research Symposia. Paul was also chair of the Committee Leadership Council's Delivery Focus Group and a member of the Public Affairs & Communications and Industrial Wastes Committees. In addition, he has served as a literature review author for the Residuals & Biosolids and Industrial Wastes Committees.

Also an active member of the Georgia Association of Water Professionals (GAWP), Paul has served as a member and chair of GAWP's Program Committee and a member of the Industrial Waste Committee. His other professional affiliations include the American Water Works Association, American Society of Civil Engineers, American Chemical Society, International Water Association, International Society of Beverage Technologists, and as a member of the Board of Directors for WEF's Charity of Choice, Water For People.

Paul received his B.S. in Natural Systems (Chemistry and Biology) from Mercer University (Macon, Ga.) in 1975, and his M.S. (1976) and Ph.D. (1982) in Environmental Systems Engineering from Clemson University (Clemson, S.C.).

NDWPCC STUDENTS & YP RECEPTION

Network and connect with students and professionals in the water and wastewater industry at this fun social event. NDWPCC Service Project volunteers are encouraged to attend!

The graphic features a dark background with a network of white circles and lines, each containing a stylized human figure. A larger, glowing blue figure is at the center. The text 'NDWPCC' is in a white box, and 'STUDENTS & YP RECEPTION' is in large white letters. A black box at the bottom contains white text about networking.

The Students & YP Reception is a great opportunity to network with industry leaders who provide safe drinking water and produce clean water resources and socialize with professionals in your field!

DATE

October 14, 2014

TIME

6:00 p.m. – 8:00 p.m.

LOCATION

Buffalo Wild Wings
1501 42nd Street South
Fargo, ND 58103

Food & Drinks will be provided.

American Water Works Association National Representative

2014 North Dakota Water and Pollution Control Conference Welcomes Brenda Lennox.

Brenda Lennox, Vice President (2014-2016) of American Water Works Association

Brenda has been with Tualatin Valley Water District for 20 years and has been an active AWWA member for 15 years. This includes efforts at the local, regional, and national level.

Local and regional involvement includes numerous committee chair and officer positions for the Pacific Northwest Section. This includes serving as Section Chair in 2010 and now as the Association Director.

At the Association level Brenda has served as Customer Service Committee Chair and team member developed curriculum for the Customer Service Certificate program. Utilizing this training program, she has helped to champion 1800+ classroom hours of training for customer service professionals in her region. Brenda serves on the Management & Leadership Division and was appointed to the Board Standing Committee on Diversity Member Inclusion by AWWA President Jim Chaffee in 2013.

After attending Human Resource Management classes at Portland State University, Brenda served as a Human Resource Director in the private sector before joining the water industry.

At Tualatin Valley Water District, she serves as Manager of Customer & Support Services. This includes oversight of customer service, billing, and the risk management program for the second largest water utility in Oregon.

Brenda lives in Warren, Oregon with husband Jerry and shares her competitive barrel racing passion with daughter Michele. She is also passionate about her career knowing that we are providing safe drinking water which is crucial for the life of our children, families, and communities. This passion has been recognized by her section as Brenda was the recipient of the Heart and Soul Award in 2005 and Powell Lindsey Citation in 2013.

NDWPCC SERVICE PROJECT

MAKE A DIFFERENCE!

You're invited to make a difference in our water environment by participating in a Service Project held in conjunction with the 2014 NDWPCC. The Service Project will help make Rabanus Park and the associated stormwater pond (one of Fargo's largest basins) more neighborhood friendly and aesthetically pleasing, while continually serving the community as a fully functioning stormwater detention basin. The service project will involve planting fruit bearing trees and shrubs in a designated area of the park.

October 13, 2014
4:00pm – 7:00pm
Rabanus Park
(18th Avenue and 42nd Street SW)

Please visit www.thefargoproject.com for information regarding The Fargo Project.

Hear, Ye! Hear, Ye! Methods of Public Notification

by LeeAnn Tillotson, North Dakota Department of Health

Just as in the past when the town crier spread the word of pertinent events to the local population by declaring the news publicly in a loud voice, situations occur today which require an efficient way to inform the public of important information. Public notification has always been a part of the Safe Drinking Water Act. The original Public Notification Rule has been periodically revised by the Environmental Protection Agency (EPA) to adapt the form, manner and timing of the notices to the relative risk to human health and to allow necessary changes due to recent EPA regulations and rule-related updates. The revised rule makes notification easier and more effective for water systems that must do the notification and their customers.

The Public Notification Rule is intended to ensure that consumers will know if there is a problem with their drinking water. These notices alert consumers if there is a serious problem with their drinking water that may pose a risk to public health. They also notify consumers if the water does not meet drinking water standards, the water system fails to test the water, or if the system has been

granted a variance (use of technology) or an exemption (more time to comply with a new regulation).

Public water systems are required to test regularly to make sure that no contaminant is present at levels which may pose a risk to human health. When allowable contaminant levels are exceeded or other unexpected events that disrupt routine sampling or production/distribution of drinking water occur, people who drink the water have a right to know what happened and what they need to do.

According to the public notice requirements of the Safe Drinking Water Act, public water systems must notify their customers when they violate EPA or state drinking water regulations (including monitoring and some reporting violations); or when a situation occurs that may compromise the drinking water (such as flooding of a well, loss of pressure to the distribution system or interruption of water treatment) thereby creating a potential risk to consumer health. EPA and the state set strict requirements on the form, manner, content and frequency of public notices.

Notices must contain a description of the violation or circumstance that occurred, including the potential health effects, the population at risk and if alternate water supplies need to be used; what the water system is doing to correct the problem; action consumers can take; when the violation/situation occurred and when the system expects it to be resolved; how to contact the water system for more information; and standard language encouraging broader distribution of the notice.

When a public water system receives a drinking water violation, a public notice template is included in the violation letter from the Department of Health Drinking Water Program (DWP). In the event of a special circumstance that occurs within a system such as flooding of a well, or loss of pressure to the system, the DWP will also develop a template for a drinking water advisory. Each template includes mandatory statements and required language necessary to inform consumers about the situation that occurred. The template has areas for the public water system to describe the event and the corrective actions that are planned or have taken place. Local contact information must also be inserted into the public notice to ensure that consumers' questions are answered in a timely manner.

Public notification must be performed within a certain timeframe depending on the severity of the violation or situation. The timeframe may be as short as 24 hours for the most serious violations, and up to a year in other circumstances. The required public notification timeframe is always clearly stated on the Proof of Public Notification form that is included with the violation letter, or another form of correspondence from the DWP.

Depending on the population served and the severity of the violation, public notification is provided to consumers by mail or direct delivery; and any other method that may reasonably reach persons served who do not receive a bill. These methods may include use of appropriate broadcast media, such as radio or television (for the most serious situations); publication in a local newspaper; delivery of multiple copies for distribution to those in apartment buildings or large places of employment; posting notice in public places or on the Internet; and/or delivery to community organizations.

The final step in public notification is certifying to the DWP that the required public notice has been accomplished. The Proof of Public Notification form must be completed and submitted to the DWP by the due date indicated on the form. Copies of each type of public notice distributed must be submitted as well.

While the methods of notifying the public have changed over the years, one thing has remained the same. Open and honest communication with consumers regarding unexpected events that occur within their public water system is important and helps develop their confidence in your hard work and in the quality of water they receive on a daily basis.

If you have questions concerning public notice requirements, please contact LeAnn Tillotson at 701-328-5293.

AWWA Board of Trustees Meeting Minutes

May 13, 2014, Mandan, North Dakota

The spring meeting of the North Dakota Section of the American Water Works Association was held at the Seven Seas Inn in Mandan, N.D. on May 13, 2014. Present at the meeting were Chair Jason Sorenson; Director Larry Thelen; Trustees Meredith Quinn, Mike Berg, Murthy Kasi, Wade Hesch; Secretary/Treasurer David Bruschwein; and Assistant Secretary/Treasurer Greg Wavra. Others attending the meeting were Dustin Dale, Mark Peterson, Dean Sletten, and Keri Schiferl.

The meeting was called to order by Mr. Sorenson at 8:00 a.m.

Secretary's Report

The Secretary's Report was presented by Mr. Bruschwein. Mr. Kasi moved to approve the minutes of the January 22, 2014 Board Meeting. Mr. Hesch seconded the motion. The motion carried.

Treasurer's Report

Mr. Wavra presented the Treasurer's Report. As of May 12, 2014, the Section had income of \$15,189.23 and expenses of \$3,768.39. The Section has \$41,937.47 in the checking and money market accounts. The Section also has \$84,178.15 in student support endowments and reserve accounts. Mr. Thelen moved to accept the Treasurer's report. Ms. Quinn seconded the motion, and the motion carried. There was discussion on the new format of the report. Mr. Wavra also reported that the Form 990 has been submitted to the IRS for 2013.

Committee Reports

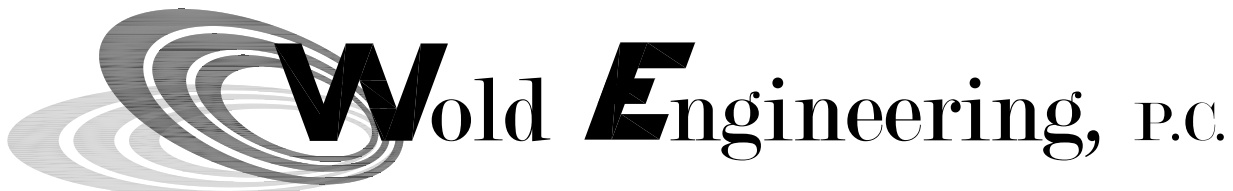

Education and Research Committee

Science Fair—Mr. Dale reported on the North Dakota Section providing two judges for the State Science Fair. The Junior Division winner was Alyssa Kemp from the Valley Edinburg School District. Her project was titled "An Evaluation of Erosion Control – Reducing Sediment in our Streams." The Senior Division winner was Katie Baumgartner from the Strasburg School District, her project was titled "Solar vs Distilled." Both received a cash award of \$75.00 and a certificate.

Surface Water Workshop - Ms. Quinn reported that the Surface Water Workshop was well received. She reported that there were 179 actual attendees with 17 walk-ins and eight poster exhibits. Ms. Quinn expected a total income from the conference of \$31,850.00 with a few outstanding registrations. Not all of the expenses for the workshop are in yet.

YP/Student Chapter—Mr. Kasi presented the YP report. Mr. Bruschwein reported that NDAWWA is working on the YP page for the NDAWWA website. Murthy is still working on creating an updated calendar and budget. The group has changed the frequency of the conference call from every month to every other month. This year, they will have five articles for the NDWPCC *Official Bulletin*.

There was discussion on the best way to handle the student memberships. The old method resulted in a long lag from when applications were submitted until AWWA processed the applications. The current method isn't working well as was shown with a drop in the student membership numbers at NDSU. The topic will need to be discussed more at the NDWPCC.

Consulting Engineers & Land Surveyors

Bottineau (701) 228-2292
Bismarck (701) 258-9227
Minot (701) 852-0338
Email: wold@woldengr.com

PR Committee—Nothing new that hasn't already been covered.

Water for the People Committee—Nothing new to report.

Membership Committee

Currently, the Section has 240 total members; of those 16 are late on their dues. The Section is also participating in the Trustee Membership Challenge. The goal is to retain 66 percent of the first year members and for each Trustee to bring in a new member.

Water Utility Council (WUC)

Wade Hesch and Brett Jochim attended the Fly-In April 1 and 2, 2014. Approximately 140 people attended this year. Mr. Hesch provided a brief report of the topics discussed.

Director's Report

The AWWA Conference and Exhibition (ACE) is coming in June. Mr. Thelen reported that the two AWWA presidential candidates will give 5-minute presentations at ACE. The AWWA Board Policy manual is in the process of being updated and is out on the AWWA website for review. The AWWA visiting officer will be AWWA Vice-President Brenda Lennox.

Old Business

Mr. Bruschwein requested that information from the nomination committees for the NDWPCC be provided to him by late July or early August.

Mr. Kasi attended the Regional Meeting of Section Officers. There were about 35 members who attended the meeting. One of the topics discussed was how the conferences are implemented. Murthy also reported that AWWA has started a new chapter in India that has a 5-year trial period.

Mr. Thelen, Mr. Brett Jochim and the student poster winner, Adam Zach, will be attending ACE.

NDAWWA will host the RMSO in 2016. A location that has good access will need to be selected. A reception will also need to be planned. AWWA will provide \$35 per person for the reception, and NDAWWA will be expected to pay for the rest of the cost of the reception.

Mr. Bruschwein reported that the press release with the proclamation declaring May 4-10 as Drinking Water Week in North Dakota was sent out last week and a photo was taken with the Governor.

There was no other old business.

New Business

Mr. Wavra reported that Shawn Heinle is interested in attending summer training.

Ms. Quinn is putting together training for the NDWPCC Fall Conference. A discussion was held on a call for papers from vendors and suggestions for training ideas for small systems. Mr. Dale suggested drought management plans as a possible topic for the training.

Mr. Bruschwein indicated that this year AWWA applied for and was awarded two EPA grants as partners with Rural Community Assistant Partnership (RCAP) and Environmental Finance Center (EFC). The plan has yet to be developed on how the training will be delivered in North Dakota. AWWA will be looking for a commitment from the local sections in July. Mr. Bruschwein indicated that he would pass along details as they come.

Ms. Quinn discussed the Community Engineering Corp.

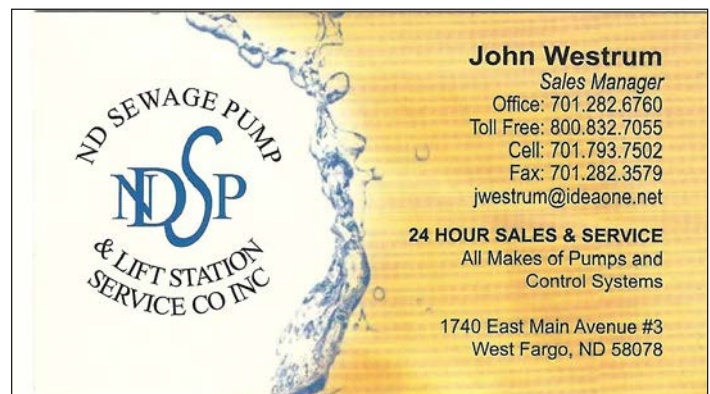

Ms. Quinn brought up a service project that was scheduled by the YP committee but was not covered by the AWWA national insurance. Ms. Quinn pointed out that, in the future, for service projects we will need to know who is working and how to cover them with insurance. She suggested possibly having a partner committee that has insurance coverage.

There was no other new business.

Mr. Hesch moved to adjourn. Mr. Kasi seconded the motion and the motion carried.

Respectfully submitted,

David Bruschwein

NDWPCC JOINT BOARD MEETING MINUTES

May 22, 2014, Mandan, North Dakota

A meeting of the Joint Board of Directors of the North Dakota Water and Pollution Control Conference (NDWPCC); North Dakota Water Environment Association (NDWEA); North Dakota Chapter of the American Public Works Association (NDCAPWA); North Dakota Section of the American Water Works Association (NDAWWA); and North Dakota Chapter of the North American Stormwater and Erosion Control Association (NASECA-ND) was held on May 13, 2014, in the Nautilus Room of the Seven Seas Inn, Mandan, N.D. The following board members and guests were present: Chuck Abel, Mike Berg, Terry Boehm, Mike Brisben, Dustin Dale, Joe Ferguson, Bill Gefroh, Dallas Grossman, Dale Heglund, Jeff Heintz, Wade Hesch, Jeff Hruby, Barry Johnson, Murthy Kasi, Wei Lin, Seth Lynne, Lance Meyer, Wayne Offerdahl, Karla Olson, Melanie Parvey, Colleen Peterson, Mark Peterson, Michael Quamme, Meredith Quinn, Karl Rockeman, Terry Rust, Dean Sletten, Jason Sorenson, Matt Sperry, Gregg Stewart, Larry Thelen, Jess Wagner, Don Wald, Greg Wavra, Chad Zander, and Gary Zuroff.

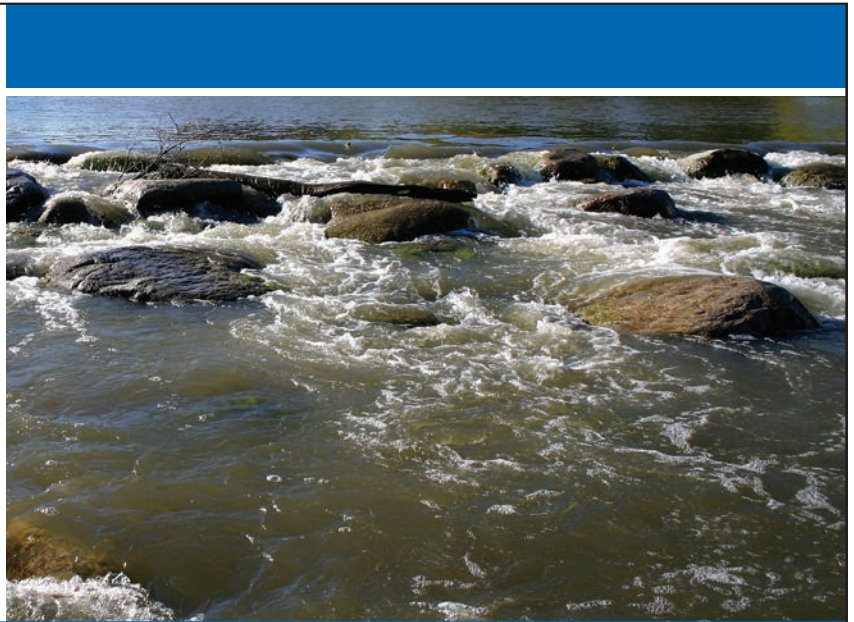

The meeting was called to order at 10:33 a.m. by NDWPCC President Dean Sletten. Copies of the meeting agenda and NDWPCC January 1 - April 30, 2014 financial report were provided to those in attendance.

President Sletten called for a motion to dispense with the reading of the minutes from the January 22, 2014 joint board meeting and approve the minutes mailed to each board member. Wade Hesch so moved, Matt Sperry seconded, and the motion carried.

Next, President Sletten called for the Treasurer's Report. Mike Brisben reported that the NDWPCC had a net loss of \$34,427.32 from January 1 - April 30, 2014 and total assets of \$65,464.06. Larry Thelen asked the reason for the loss. Mr. Brisben noted that a deposit for approximately \$9,500.00 was made on May 12, 2014 and that the conference was waiting for a reimbursement request of \$31,000 from the Bank of North Dakota for the ND Department of Health Operator Expense Reimbursement Program. Bill Gefroh asked how the conference fared in Grand Forks. Mr. Brisben reported that with the support of the city of Grand Forks and the Grand Forks CVB the conference netted about \$6,000.00. President Sletten called for a motion to approve the Treasurer's report. Seth Lynn so moved, Barry Johnson seconded, and the motion carried.

Next, President Sletten called for topics and presenters for the fall conference. Colleen Peterson noted that NASECA-ND had compiled a list and that Greg Davis would be presenting on the EPA stormwater regulations. Terry Rust indicated that presentations on enforcement action in western North Dakota and a report on the Casselton train derailment would be of interest. Mr. Brisben asked the joint boards to provide a list by June 1, 2014.

Next, President Sletten asked for an update on the 2018 conference. Mr. Brisben read a letter from Hazel Sletten, Utilities Director, Grand Forks Water, asking the joint boards to consider Grand Forks as an alternate host for the 2018 conference and to consider adding Grand Forks to the annual rotation. Mr. Brisben noted that the proposal was being considered due to the late dates (October 30, 31 and November 1, 2018; available in Bismarck. Mr. Rust asked what the lead time was to schedule the annual conference. Mr. Brisben indicated that the timeframe for a mid-October conference was five to six years out. Larry Thelen made a motion to accept the Grand Forks offer to host October 15-17, 2018. Meredith Quinn seconded. Next, further discussions ensued regarding host rotation in regard to the Minot location. Lance Meyer and Dale Heglund supported the Minot rotation. Seth Lynne noted there was a motion, and the meeting should get back on track. President Sletten called for a vote to accept the Grand Forks offer, and the motion carried.

Moving on, President Sletten called for a discussion on the 2019 conference. Jeff Heintz made a motion for Bismarck to host in 2019. Bill Gefroh seconded. Mr. Brisben noted that the only dates available for a Tuesday, Wednesday, and Thursday schedule were October 29-31, 2019. President Sletten called for a vote. Board members did not vote in favor or oppose. Mr. Lynne recommended the motion be tabled until the next meeting. Mr. Thelen suggested that the boards be more flexible if Bismarck were to be chosen in 2019. Joe Ferguson indicated that the Tuesday, Wednesday, and Thursday schedule was more convenient for small system operators who might have to work the weekend.

Mr. Thelen indicated 2019 might be an exception and motioned for Mr. Brisben to explore other options with the Ramkota Hotel. Terry Rust seconded and the motion carried.

Next, President Sletten called for any other old business. Hearing none, President Sletten called for a report on the Fargo local arrangement and convention center meetings.

Dustin Dale reported that two confined space training sessions were discussed. Wayne Offerdahl noted that tentative times of 9:00 a.m. - 12:00 noon and 1:00 p.m. - 4:00 p.m. had been reserved Monday, October 13 at Fargo training facility. Mr. Brisben noted that Eric Dodds is surveying interest for a special project at Rabanus Park for students, young professionals, and conference attendees. Mr. Lynne shared that a student/YP social was being planned offsite. Mr. Dale indicated that the special project may be linked to the social. Mr. Brisben also noted that a block of 175 rooms would be available at the Holiday Inn with a conference rate of \$119.00.

Ms. Quinn asked if a study session on, Monday, prior to the operator exams, would be helpful. Mr. Brisben asked if a date had been determined for the NDAWWA Poster Competition noting that in 2010 it was held in the exhibit hall in conjunction with the vendor program.

Next, Mr. Brisben reported that 358 operators attended the 2014 spring training sessions. Operators wrote 256 exams and had a passing rate of 72 percent. Mr. Brisben also indicated that the exhibit, sponsor, and presenter mailing was scheduled for the first week in June.

Next, President Sletten called for any other new business. Wade Hesch asked if discussion on the Minot location could be reopened. Mr. Rust reminded the members that Minot was put into the rotation to make it easier for an operator from the northwest part of the state to obtain continuing education credits. Barry Johnson added that the facilities in Minot needed to be improved or conference attendance could be lower. Mr. Meyer indicated that expansion of the convention center at the International Inn was being discussed.

President Sletten called for any other new business. Hearing none, President Sletten called for a motion to close the meeting. Seth Lynne so moved, Karla Olson seconded, and the motion carried.

The meeting adjourned at 11:09 a.m. NDCAPWA can be thanked for the refreshments and noon luncheon.

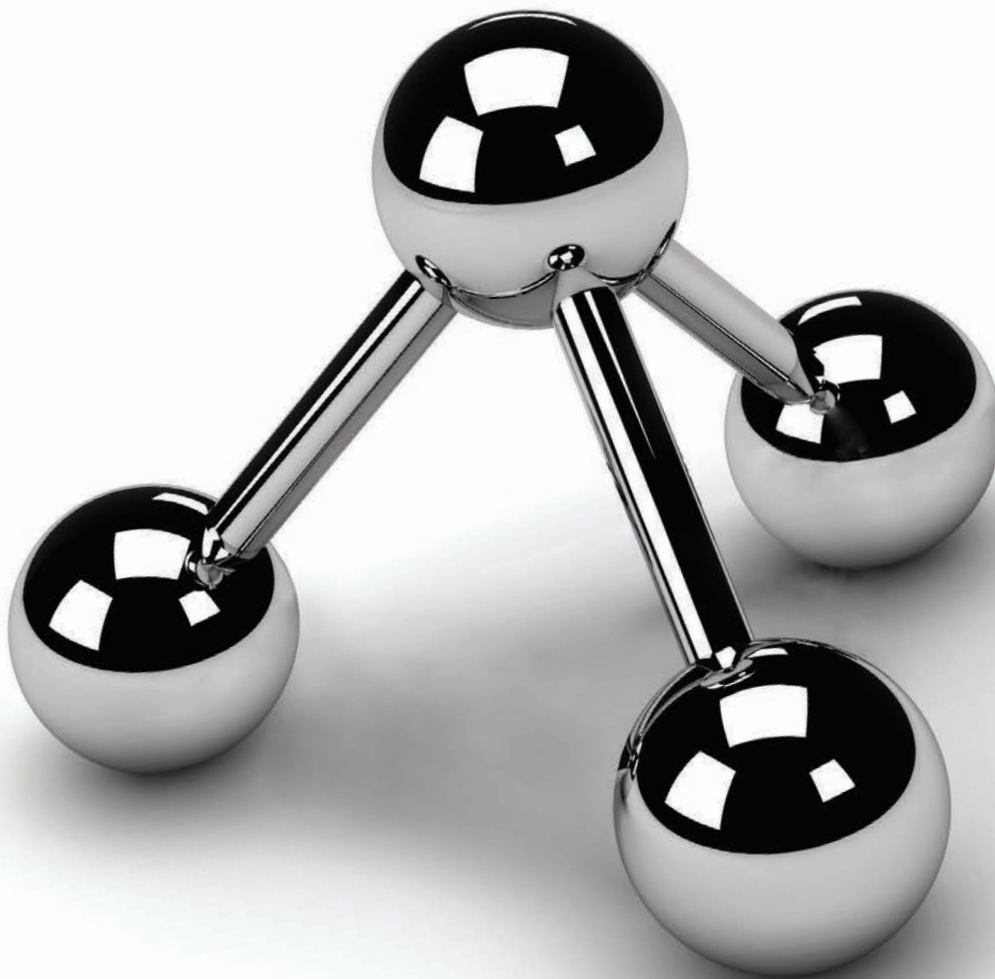

Respectfully submitted,
Mike Brisben,
Secretary/Treasurer

AWWA Board of Trustees Meeting Minutes

January 22, 2014, Mandan, North Dakota

The winter meeting of the North Dakota Section of the American Water Works Association was held at the Seven Seas Inn of Mandan, N.D. on January 22, 2014. Present at the meeting were Chair Jason Sorenson; Chair-elect Dennis Larson; Director Larry Thelen; Trustees Meredith Quinn, Mike Berg, Murthy Kasi; and Secretary/Treasurer David Bruschwein; Assistant Secretary/Treasurer Greg Wavra. Others attending the meeting were Dean Sletten, Shawn Heinle, Dustin Dale, and Mark Peterson.

The meeting was called to order by Mr. Sorenson at 7:45 a.m.

Secretary's Report

The Secretary's Report was presented by Mr. Bruschwein. Mr. Berg moved to approve the minutes of the October 22, 2013 Board Meeting. Ms. Quinn seconded, and the motion passed.

Treasurer's Report

Mr. Wavra presented the Treasurer's Report. As of December 31, 2013, the section had income of \$28,052.73 and expenses of \$19,535.98. This leaves an overall profit for 2013 of \$8,516.75. The section has \$29,688.75 in the checking and money market accounts. The section also has \$84,178.15 in student support endowments and reserve accounts. There was discussion on the finances for 2013. The Section had lower expenses in 2013 than in a normal year because Mr. Thelen did not attend the ACE, Moore Engineering covered Mr. Sletten's participation at the ACE to receive his Fuller Award, and the poster award winner was very frugal with her participation at Annual Conference Exhibition (ACE). There were also discussions on how to streamline the reimbursement to the student chapter. Mr. Thelen moved to accept the Treasurer's report. Mr. Kasi seconded and the motion carried.

Committee Reports

Education and Research Committee. (Ms. Quinn)

Science Fair - The State Science and Engineering Fair will be April 3-4 at UND. We are providing two certificate awards to each of the six regions this year with an AWWA giveaway. We are also providing certificates for the state fair and a \$75 cash award for the Junior and Senior division Best Project Related to Drinking Water Quality. Typically, NDAWWA provides two judges to judge this award at the state competition.

Fred Goetz and Ms. Quinn will find judges for the day. Murthy will work with UND to find student judges for the event. Judges sign-up is online this year. If anyone is interested in judging, please let Ms. Quinn know and she'll send you a link.

Surface Water Treatment Workshop—Planning continues. The next call will be February 6 at noon. New this year, we'll offer registration online through MNAWWA. We also intend to send registration forms to all NDAWWA membership. The location this year is new to the Surface Water Workshop but not to NDAWWA. We will have the workshop at the Holiday Inn in Fargo. An agenda is being distributed.

Poster competition—In the future this will be a YP Committee report. Adam Zach has already been in touch to make arrangements for ACE in Boston. Murthy and Michael Quamme will coordinate *Official Bulletin* articles for the top poster winners for June (or sometime in 2014). They still need to decide how they will edit articles and/or gather a list of volunteers who will review submitted articles before they're sent to the *Official Bulletin*.

Official Bulletin Article—the YP committee is submitting articles for the *Official Bulletin*. Ms. Quinn would like to begin collecting articles from other AWWA members for the *Official Bulletin* and am looking for feedback from Trustees.

NDWPCC Presentations—The University/YP Day worked well last year. Ms. Quinn will ask Murthy to get feedback from students since we didn't see an evaluation form after the conference.

Operator Training Manual—With the creation of the YP Committee, Ms. Quinn's yearly task list is conferences, Science Fair, and OB content. She has not forgotten the Operator Training Manual. It is on my task list but will most likely not make a big showing until the time is right, and the right people are in place to help create it.

YP/Student Chapter—Mr. Kasi reported that the chapter now has a LinkedIn page and a Twitter account and would like to have a YP page on the NDAWWA website. The poster competition in the future will have two tracks: a water track where the winner is sponsored by NDAWWA to attend the ACE, and a wastewater track where the

winner gets \$100. Currently, there are 54 members that qualify as YP. Murthy is working on creating a calendar and a budget for the YP committee. The group does do a monthly conference call.

Membership Committee

Mr. Sletten reported the Section is at 246 members, including 11 that are late on their dues.

Water For the People

Mr. Bruschwein reported that the Section raised \$7,385. The goal of the committee was to again raise at least \$5,000 to attain the level of country sponsor.

Public Relations

Ms. Quinn reported that the PR committee is working hard on the Surface Water Workshop.

Water Utility Council (WUC)

Mr. Peterson reported the council is preparing for the upcoming Fly-In.

Director's Report

Mr. Thelen presented the Director's Report.

Old Business

The Section received a thank-you letter from Rodney Kalis (2013 Operator Meritorious winner).

There was no other old business.

New Business

Chair Sorenson appointed the following committees with the Board's approval;

Trustee – Mr. Sletten (chair), Ms. Quinn, and Mr. Larson

Fuller – Mr. Brett Jochim(chair), Mr. Sletten, Ms. Quinn, Mr. Stockert, Mr. Bruschwein
Operator Meritorious – Mr. Sletten (chair), Mr. Wavra, Mr. Kasi

Director – Mr. Thelen and Ms. Lisa Ansley

The Regional Meetings of Section Officers (RMSO) will be held in Des Moines, IA on April 4 and 5. Mr. Murthy expressed an interest in attending.

The North Dakota Section will host the RMSO in 2016. Chair Sorenson appointed the following committee with the Board's approval: Ms. Quinn, Mr. Wavra, Mr. Dale, Mr. Sorenson, Mr. Heinle, and Mr. Bruschwein.

Ms. Quinn moved to give the same amount in donations to organizations as was done in 2013. Mr. Thelen seconded the motion, and the motion carried.

Mr. Murthy moved to allocate \$1,000 for promotional AWWA items for booth giveaways. The motion was seconded by Mr. Larson. The motion carried.

Drinking Water Week is May 4-10, 2014. The Section will arrange a Governor Proclamation signing photo and a press release. The Section will not place an advertisement in state newspapers this year.

Mr. Thelen moved to add the YP committee to the second-year trustee portfolio in the trustee committee rotation policy. The motion was seconded by Mr. Bruschwein, and the motion passed.

Mr. Thelen moved to add Mr. Heinle to the Section checkbook and remove Mr. Thelen from the checkbook. The motion was seconded by Ms. Quinn, and the motion carried.

The group consensus was to continue the tradition of holding the New Trustee Training the evening before the Winter Board Meeting.

After discussion with the new trustees and the Board, it was decided to have Mr. Berg as the second-year trustee and Mr. Kasi as the first-year trustee.

Mr. Thelen motioned to adjourn. Ms. Quinn seconded. The meeting adjourned at 9:50 a.m.

Respectfully submitted,

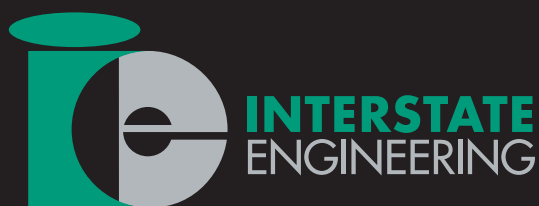

David Bruschwein
Secretary- Treasurer

**Engineering
America**

A 100% Employee-Owned Company

From Concept & Construction To Completion & Beyond

Engineering America Provides a One-Source Solution For Your Unique Storage Tank Application.

Our bolted tank design is the preferred dependable, versatile and **cost-effective** choice in wastewater treatment storage. Single-use applications range from stormwater runoff storage, equalization and trickling filters to sludge storage/mixing.

We've been building our tanks in North Dakota since 1980.

**We know the state of North Dakota and the state
of North Dakota knows us.**

Dickinson, North Dakota

Apex Engineering Group was founded in 2010 by an entrepreneurial group of engineers and technicians with a long history in the engineering consulting business. The owners and employees of Apex share a common vision of what it takes to build a successful engineering firm - exceptional client service, quality work, integrity, experience, expertise and a drive for success. Our team has extensive experience in the industry and this region. Our leaders are professionals with proven track records of producing successful projects, many long-term clients and are considered experts in their respective fields. At Apex we have put a ban on bureaucracy. We have stripped away anything and everything that stands in the way of what matters: serving our clients. Apex's business focus is water, transportation, municipal, and electrical engineering services. We have offices located in Fargo and Bismarck, North Dakota and Detroit Lakes, Minnesota.

S. Roberts Co
Providing Cleantech Water Solutions

We Provide Cleantech Water Solutions

When It Comes To Waterworks, There Can Be A Lot Of Pressure.

To succeed, you need a partner that makes your job easier. With DSG and Fargo Water Equipment, you get more than just pipe and products:

A Wider Distribution Network – With waterworks warehouse locations in Fargo, Sioux Falls, Rapid City and Bismarck, we can provide products where and when you need them.

The Most Experienced Waterworks Team In The Midwest – Our crew specializes in combining experience and innovation to offer you solutions for your challenging projects.

Whatever Your Situation, We Make Water Work – From water systems to industrial pumping applications, from storm water to metering, we're experienced and ready to make your job easier.

Shaping Your World.

Flood Protection

The 2011 Mouse River Flood was a tragedy for the Minot community that will never be forgotten, but hopefully never relived.

To prevent the likelihood of future floods, a floodwall/tie-back levee system and modifications to the intake system of the Minot Water Treatment Plant are being developed by Houston Engineering, Inc. and MWH.

Learn more about this project at the ND Water and Pollution Control Conference.

North Dakota Water & Pollution Control Conference

Pre-Conference Workshop

Confined Space Entry Training

Description:

This workshop will provide participants with the information needed to identify confined spaces, to understand the potential hazards of working in confined spaces and the elements necessary to control those hazards.

Upon completion of this workshop attendees will be eligible for 2 CEC's through the North Dakota Department of Health.

When: Monday October 13, 2014. 9:00 am – 3:00 pm. Lunch will be provided

**Where: Fargo Public Safety Center
4630 15th Avenue NW
Fargo, ND 58102**

**Instructors: Luke Lindberg, Safety Coordinator, City of Fargo
LeRoy Skarloken, Asst. Chief/Operations, City of Fargo Fire Dept.**

Registration Fee: \$10.00. Make check payable to NDWPCC

To register, complete form below and mail (along with registration fee check) to the address below:

DESIGNING FOR A BETTER TOMORROW

Since 1977 Team Laboratory Chemical Corp. has responded to the needs of operators in the wastewater industry with its TeamTreat™ lineup of products. The TeamTreat™ program was developed as both a problem-solving and preventative maintenance program. TeamTreat™ will enable your entire wastewater system, from collection to treatment, to operate at maximum efficiency.

Ready-To-Operate

microBLOX™ Membrane Bioreactor (MBR) systems are fully functional, ready-to-operate, wastewater treatment solutions designed to be extremely simple to operate and maintain

Ideally suited to a wide range of applications including: oil field man camps, pump and haul, retrofits, remote sites, lodging, residential housing developments, and more.

Each system can be guaranteed to meet the most stringent resale/reuse limits required by oil fracking companies or other State/EPA mandated requirements for reuse/recycle water quality limits.

Key Features and Benefits

- Treat flows from 3,500 to 250,000 GPD with high loading capability
- Ready-to-Operate, deployable package plant
- Effluent can be sold/used as fracking water
- 12 week delivery
- Owner financing and rentals available
- Sludge hauling cost reduced by up to 80%
- Smallest footprint on the market
