## COUNT ON US

In the waterworks business, time means money. At Ferguson, we understand this fact and want to ensure you meet your schedule by providing you the largest inventory in the region:

- Water & Sewer Distribution Products
- Water Meter Systems
- Storm Water Systems
- Rural Water Systems
- Treatment Plant Pipe & Valves
- Polyethylene Pipe & Fusion Equipment
- Pressure Sewer Systems
- On-Site Septic Systems
- Irrigation Systems
- Locators & Safety Equipment
- Geosynthetic Products
- Erosion Control Products

You can COUNT ON Ferguson Waterworks to provide you what you need.

# Federal Fluoride Recommendation Lowered

by Heather Syverson, AE2S Communications Coordinator

For the first time since 1962, the federal government has changed its fluoridation recommendation. The U.S. Department of Health and Human Services (USHHS) and U.S. Public Health Service (USPHS) say in order to balance dental protection, while limiting the risk of dental fluorosis, the optimal fluoride concentration is 0.7 milligrams/liter (mg/L). Although USPHS recommends water fluoridation as an effective public health tool, the decision of whether or not to use fluoride is made by State and local governments.

In light of the new recommendation, the U.S. Environmental Protection Agency (USEPA) is in the process of determining whether it will change the maximum amount of fluoride allowed in drinking water under the Safe Drinking Water Act. Any changes to the standard could affect water systems that have naturally occurring fluoride. Currently, the USEPA's limit is set at 4.0 mg/L to protect against severe skeletal fluorosis, a bone disease that is caused by excessive fluoride ingestion over an extended period of time.

In North Dakota, fluoridation of public water systems is a voluntary program. The ND Drinking Water Program manages the voluntary implementation as well as provides fluoride level and sampling guidelines which must be followed for all participating systems. In 2011, in response to the announcement from the USHHS and the USEPA of a proposed recommendation of 0.7 milligrams of fluoride per liter of water to replace the previous 1.2 milligrams, North Dakota provided the guideline for the optimal level of fluoride of 0.7 mg/L. An acceptable range of 0.6 to 1.7 mg/L of fluoride is allowed. The optimal fluoride level guideline for the State will be maintained at 0.7 mg/L in response to the official recommendation.

The new federal recommendation was developed by a panel of representatives from the USHHS, Centers for Disease Control (CDC), National Institutes of Health, U.S. Food and Drug Administration, Agency for Healthcare Research and Quality, Office of the Assistant Secretary for Health, USEPA, and U.S. Department of Agriculture. The panel used recent study results to review the fluoride standards that were established in 1962. The previous standards ranged from 0.7 to 1.2 mg/L and were based on the theory that residents of warmer climates drink more water; therefore, the fluoride concentration in those geographies could be lower than in colder areas.

It was determined that 0.7 mg/L is the optimal fluoride concentration based on the following points:

- Community water fluoridation remains an effective public health strategy for delivering fluoride to prevent tooth decay and is the most feasible and cost-effective strategy for reaching entire communities.
- In addition to drinking water, other sources of fluoride exposure including toothpaste, mouthwash, and professional fluoride treatments have contributed to the prevention of tooth decay and an increase in dental fluorosis prevalence.
- Preventive benefits can be achieved and the risk of dental fluorosis reduced at 0.7 mg/L.
- Recent data do not show a convincing relationship between water intake and outdoor air temperature. Thus, recommendations for water fluoride concentrations that differ based on outdoor temperature are unnecessary.

If you would like to compare how much fluoride is included in your water system's H<sub>2</sub>O with other water systems, check out the CDC's "My Water's Fluoride" app. It breaks the information down by State, county, and individual water system.

# Governor Proclaims Drinking Water Week in North Dakota

*Bismarck, North Dakota*

BISMARCK, N.D. – Gov. Jack Dalrymple has declared May 3 through 9, 2015, as Drinking Water Week in North Dakota.

This annual event is dedicated to the belief that North Dakotans should have a safe and dependable supply of water, both now and in the future. Citizens are called upon to help protect the state's source waters from pollution.

Drinking Water Week recognizes the importance of source water protection and water conservation, as well as the value, importance and fragility of the state's water resources.

Organizations involved in the promotion of Drinking Water Week include the North Dakota Department of Health, the North Dakota Section of the American Water Works Association, the North Dakota Water and Pollution Control Conference, the North Dakota Chapter of the American Public Works Association, the North Dakota Water Environment Association and the North Dakota Rural Water Systems Association.

For More Information on Drinking Water Week, contact:

Greg Wavra, Drinking Water Program

Phone: 701.328.5224

WHEREAS, water is our most valuable natural resource; and

WHEREAS, only tap water delivers public health protection, fire protection, support for our economy and the quality of life we enjoy; and

WHEREAS, any measure of a successful society – low mortality rates, economic growth and diversity, productivity, and public safety – are in some way related to access to safe water; and

WHEREAS, we are all stewards of the water infrastructure upon which future generations depend; and

WHEREAS, North Dakotans are encouraged to help protect our source waters from pollution, to practice water conservation, and to get involved in local water issues during the first week of May.

NOW, THEREFORE, as Governor of the State of North Dakota, I do hereby proclaim May 3-9, 2015, as DRINKING WATER WEEK in the state of North Dakota.

Jack Dalrymple  
Governor

Front row (L to R): LeeAnn Tillotson, Drinking Water Program, North Dakota Department of Health; Governor Jack Dalrymple; Chuck Abel, Executive Secretary, North Dakota Chapter of American Public Works Association. Back row (L to R): Larry Thelen, Director, North Dakota Section of the American Water Works Association; Bill Gefroh, Secretary-Treasurer, North Dakota Water Environment Association; Mike Berg, Director, North Dakota Water and Pollution Control Conference.

# North Dakota Water Environment Association Minutes

*Annual Meeting Minutes, Fargo, North Dakota*

The North Dakota Water Environment Association (NDWEA) held its annual business meeting on Wednesday, October 15, 2014 at the Holiday Inn in Fargo, North Dakota. President Jessica Wagner called the meeting to order, 238 people were present at the 12:00 p.m. business luncheon.

The 2013 NDWEA annual meeting minutes were published in the Official Bulletin. President Wagner asked if there were any objections to dispensing with the reading of the minutes. There were no objections. Tom Welle made a motion to dispense with the reading and approval of the minutes as published. Eric Dodds seconded the motion and the motion passed.

Karla Olson was called upon by President Wagner to present the Secretary-Treasurer's report in Bill Gefroh's absence. As of September 30, 2014 the NDWEA has a general fund balance of \$9,647.55, reflecting a net income of \$1,029.85 since January of 2014. The NDWEA membership is at 139, last year at this time it was 125. Michael Quamme made a motion to approve the Treasurer's report. Mel Bullinger seconded the motion and the motion passed.

The NDWEA promotes education of the water environment. Expenditures are aimed at environmental activities that promote water & wastewater education, pollution prevention, resource recovery, preservation and conservation. Awards presented by the NDWEA in 2014 will be announced at the banquet tonight. President Wagner called upon Dr. Wei Lin from the Nomination Committee, to present the NDWEA nominations. The Nominating Committee members were Don Tucker, Wei Lin and Karla Olson. Dr. Lin reported that the Nomination Committee has one nomination for the incoming NDWEA Vice President, Michael Quamme. There were no nominations from the floor and no vote was necessary. Karla Olson was called to nominate the following NDWEA slate of officers for 2014/2015:

President: Karl Rockeman  
President-Elect: Gary Zuroff  
Vice President: Michael Quamme  
Secretary-Treasurer: Bill Gefroh  
Delegate: Karla Olson, 2nd year of three-year term

Professional Wastewater Operations: Don Wald, 2nd year of three-year term

Past President: Don Tucker

Past President: Wei Lin

Past President: Jessica Wagner

President Wagner introduced the guest speaker, Mr. Paul Bowen the WEF Vice President. Mr. Bowen spoke about WEFTEC 2014 in New Orleans, Louisiana. He invited all present to share their passion for water by attending WEFTEC, the world's largest water quality event. In 2014 there were over 20,000 attendees and the vendor display area was over 300,000 square feet of exhibit space. Mr. Bowen noted that North Dakota is well represented nationally by the recent participation in the young professional groups, delegate position, delegate at large position and the NDSU student design team.

Vice President Bowen spoke about the national WEF organization objectives and strategies. First, he spoke of the objective of 'driving innovation' in the water industry. Some examples of WEF supporting this objective is through work on energy and resource recovery, developing an energy roadmap, supporting energy self-sustaining efforts, working on a nutrient roadmap and sponsoring the Innovation Pavilion. Second, WEF is striving to 'enrich your experience' as a member of WEF. They support you the member by sponsoring technical publications, 6 specialty conferences in 2015, 10 free webcasts and WEFTEC presentations and publications. Third, WEF is trying to 'raise awareness' of the water industry in general. They are promoting the fact that water projects are infrastructure projects too. They have joined a coalition of other water industry groups to promote the "Value of Water" worldwide. Finally, WEF is fostering the relationship between the member associations and WEF by offering a Member Association Engagement Team. This team will work directly with MAs to provide support as needed. Vice President Bowen concluded with WEF's old tag line "Water is Worth It" and challenged those in attendance to share their Passion about Water and the Water Industry.

The Annual Conference Breakfast Buffet Poker hand winners were announced:

Random Drawing: Todd Olson and Dean Corcoran each received \$50.00 cash.

3rd Place Poker Hand: Matt Stabler received \$50.00 cash.

2nd Place Poker Hand: Tim Folson received \$50.00 cash.

1st Place Poker Hand: Alice Pekarski received \$100.00 cash.

The slate of officers were read by President Wagner. Tom Welle moved that the nominations be closed and a unanimous ballot be cast for the nominated slate of announced officers. Eric Dodds seconded the motion, and the motion passed.

At this time, President Karl Rockeman became the Chief Officer of the NDWEA. President Karl Rockeman presented Jessica Wagner with the President's Service Award. Bill Gefroh received the Past Delegate award. With no further business Mr. Rockeman asked for a motion to adjourn. Steve Burian made a motion to adjourn. Tom Welle seconded the motion and Mr. Rockeman adjourned the meeting.

Respectfully submitted,  
Karla Olson  
Delegate

# NDWPCC JOINT BOARD MEETING MINUTES

*January 21, 2015 Bismarck, ND*

A meeting of the Joint Board of Directors of the North Dakota Water and Pollution Control Conference (NDWPCC); North Dakota Water Environment Association (NDWEA); North Dakota Chapter of the American Public Works Association (NDCAPWA); North Dakota Section of the American Water Works Association (NDAWWA); and the North Dakota Chapter of the North American Stormwater and Erosion Control Association (NASECA-ND) was held on January 21, 2015, in the Governor's Room of the Ramkota Hotel, Bismarck, ND. The following board members and guests were present: Chuck Abel, Mike Berg, Mike Brisben, David Bruschwein, Dustin Dale, Tracy Eslinger, Bill Gefroh, Eric Gilbertson, Dallas Grossman, Marty Haroldson, Dale Heglund, Shawn Heinle, Jeff Heintz, Jeff Hruby, Dan Jonasson, Dennis Larson, Wei Lin, Seth Lynne, Wayne Offerdahl, Tim Paustian, Mark Peterson, Derrick Placek, Mike Quamme, Meredith Quinn, Bryan Schmitt, Reed Schwartzkopf, Dustin Scott, Dean Sletten, Jason Sorenson, Matt Sperry, Gregg Stewart, Jess Wagner, Don Wald, Greg Wavra, and Aaron Wellman.

The meeting was called to order at 10:37 a.m. by NDWPCC President Dan Jonasson. Copies of the meeting agenda and 2014 NDWPCC financial report were provided to those in attendance.

The first order of business President Jonasson called for a motion to dispense with the reading of the minutes from the October 14, 2014 joint board meeting and October 16, 2014 business meeting in Fargo, and approve the minutes mailed to all board members. Seth Lynne so moved, Dean Sletten seconded, and the motion carried.

Next, President Jonasson called for the Treasurer's Report. Mike Brisben read the 2014 NDWPCC financial report which showed a net income of \$21,300.00 and total assets of \$121,191.38. Mr. Brisben noted that two large deposits the end of December accounted for the majority of the undeposited funds on the December 31, 2014 Balance Sheet. President Jonasson called for any further discussion. Hearing none, President Jonasson called for a motion to approve the Treasurer's Report. Jason Sorenson so moved, Mike Quamme seconded, and the motion carried.

Next, President Jonasson called for a report from the Auditing Committee. Mike Berg thanked Shawn Heinle and Mr. Brisben for their hard work and noted that the NDWPCC financial records looked great.

Continuing with old business, President Jonasson asked for an update on the 2015 Conference in Bismarck. Mr. Brisben asked members from Bismarck if any special events were being considered. Bill Gefroh recommended the topic be discussed by the local arrangement committee and revisited during the next joint board meeting.

Next, President Jonasson asked for a report on the 2016 conference in Minot. Mr. Brisben noted that the October 10-13, 2016 dates had been reserved at the Holiday Inn Riverside and the Grand International had been notified. Mr. Brisben said he would also work with Minot CVB to secure other rooms at conference rate and that two new hotels opened nearby.

President Jonasson asked for a report on the 2014 conference in Fargo. Mr. Brisben noted that 420 people pre-registered and 419 people did attend. Two hundred fourteen people were served during the Tuesday NDAWWA business luncheon, 238 the Wednesday NDWEA luncheon, and 171 Thursday during the NDCAPWA/NDWPCC joint luncheon. The Tuesday buffet served 152, the Wednesday breakfast 300 and the awards banquet 243. The exhibitor program had 67 vendors reserving 78 booths.

President Jonasson asked for any other old business. Hearing none, President Jonasson requested topics and presenters be provided to Mr. Brisben by the next joint board meeting May 19, 2015.

Next, President Jonasson called for a report on the 2015 Water and Wastewater Operator Training Program. Mr. Brisben, indicated that announcements had been mailed and that six sessions (four water and two wastewater) are scheduled in March and April.

Next, Mr. Brisben listed available dates for the 2020 conference in Minot and 2021 conference in Fargo. He also noted the 2023 dates in Bismarck were unavailable but October 11-13, 2022 were tentatively booked. Mr. Brisben recommended the 2022 Grand Forks and 2023 Bismarck venues be switched and he indicated he would follow up with the Alerus Center to reserve dates in 2023. Mr. Gefroh asked if the Civic Center had been considered for 2019 in Bismarck and possibly future conferences. Mr. Brisben stated that rental fees would be approximately \$6,000 to \$8,000 but said he would check. Mr. Brisben asked Mr. Gefroh if the city and Bis-Man CVB would be willing to help with the added costs.

Next, President Jonasson asked for other new business. Mike Quamme reported on costs and services for an independent NDWPCC website. Greg Wavra stated that a full service website with the ability to manage all conference activities would be the best option. Mr. Quamme agreed to check further and report at the May meeting.

President Jonasson called for any other new business. Hearing none, President Jonasson called for a motion to close the meeting. Dean Sletten so moved, Wayne Offerdahl seconded, and the motion carried.

The meeting adjourned at 11:07 a.m. NASECA-ND can be thanked for the refreshments and noon luncheon.

Respectfully submitted,  
Mike Brisben  
Secretary/Treasurer

# Governor Proclaims Public Works Week in North Dakota

*Bismarck, North Dakota*

BISMARCK, N.D. – Gov. Jack Dalrymple has proclaimed May 17 through 23, 2015, as Public Works Week in North Dakota.

Public Works Week is observed annually to celebrate the contributions of public works professionals, including those who manage community water, sewer, public transportation, and refuse-removal systems, as well as those who are responsible for maintaining public buildings and grounds.

“We value our communities and the role public works professionals play in keeping them safe and functioning smoothly,” said Chuck Abel, executive secretary for the North Dakota Chapter of the American Public Works Association. “Public works professionals maintain and improve the systems and services vital to a community’s health, safety and comfort.”

For more information about Public Works Week, contact Chuck Abel at 701.328.5207.

Please note: Proclamation to follow.

WHEREAS, public works infrastructure, facilities and services are of vital importance to the health, safety and well-being of the people of North Dakota; and

WHEREAS, it is important for the citizens and civic leaders of this state to gain knowledge of and to maintain a progressive interest in the public works needs and programs of their respective communities; and

WHEREAS, public works professionals, engineers and administrators are responsible for and must design, build, operate and maintain the transportation, water supply, sewage and refuse disposal systems, public buildings, and other structures and facilities essential to serving our citizens; and

WHEREAS, North Dakota’s public works professionals, engineers and administrators should be recognized for their dedication and contributions to the growth, development and stability of our state.

NOW, THEREFORE, as Governor of the State of North Dakota, I do hereby proclaim May 17-23, 2015, PUBLIC WORKS WEEK in the state of North Dakota.

# Minutes of the Board of Trustees Meeting North Dakota Section of AWWA

*January 21, 2015 Bismarck, ND*

The winter meeting of the North Dakota Section of the American Water Works Association was held at the Ramkota Inn of Bismarck, N.D. on January 21, 2015. Present at the meeting were Chair, Dennis Larson; Past Chair, Jason Sorenson; Chair-elect, Meredith Quinn; Director-elect, Tim Paustian; Trustees, Mike Berg; Secretary/Treasurer, David Bruschwein; Assistant Secretary/Treasurers, Greg Wavra, and Shawn Heinle. Others attending the meeting were Dean Sletten, Dustin Dale, Aaron Wellman, Bryan Schmitt, Dr. Wei Lin, and Mark Peterson.

The meeting was called to order by Ms. Quinn at 8:10 a.m.

There was no Secretary's Report as there were no minutes prepared from the October 22, 2014 Board Meeting.

Mr. Wavra presented the Treasurer's Report. As of December 31, 2014, the section had income of \$33,731.88 and expenses of \$29,483.58. This leaves

an overall profit for 2014 of \$4,248.30. The section has \$34,764.93 in the checking and money market accounts. The section also has \$84,354.80 in student support endowments and reserve accounts. There was discussion on the finances for 2014. The format of the new print-out was covered. Ms. Quinn moved to accept the Treasurer's report. Mr. Sorenson seconded and the motion carried.

## Committee Reports

Education and Research Committee - Ms. Quinn and Mr. Dale

Mr. Dale covered the 2016 Surface Water Workshop. The Workshop will be April 26, 27 and 28 of 2016.

Ms. Quinn talked about ideas for the fall NDWPCC. She discussed doing a call for papers with a deadline of mid-April.

## Membership

Mr. Sletten reported the Section is at 260 members, including 13 that are late on their dues. The Section did meet its goals for the 2014 Membership Challenge. Everybody thanked Dean for the excellent job that he did in the Membership Challenge.

## WFP

Mr. Bruschwein reported that the Section raised almost \$10,000 in 2014. The goal of the committee was to again raise at least \$5,000 to attain the level of country sponsor.

## WUC

Mr. Peterson reported the council is preparing for the up-coming Fly-In. Details are not set yet and he is looking for people interested in attending. He also mentioned that Eric Volk is covering the legislative session this year.

## Director's Report

Mr. Paustian presented the Director's Report. The Mid-Winter Board Meeting had just been held in Santa Fe. The Association budget approved in December was at \$30,000,000 and includes \$600,000 of profit for the year.

## Old Business

Mr Wavra and Mr. Bruschwein covered the EPA training grant. The training session will be held at the Environmental Training Center in early September. The Health Department is willing to cover 4 hours of the training so the Section needs to find instructors for the other 4 hours.

Mr. Wavra presented a proposed budget for 2015. Mr. Sorenson moved to accept the 2015 budget. The motion was seconded by Mr. Berg and the motion passed. There was no other old business.

## New Business

Chair Larson appointed the following committees with the Board's approval;

Trustee – Ms. Quinn (chair), Mr. Bruschwein, Mr. Hescl

Fuller – Mr. Wavra (chair), Mr. Jochim, Mr. Sletten, Ms. Quinn, Mr. Stockert

Operator Meritorious – Mr. Sletten (chair), Mr. Wavra, Mr. Heinle

The RMSO will be held in Rosemount, Illinois in April. Mr. Dale expressed an interest in attending.

The North Dakota Section will host the RMSO in 2016. The Board decided at the October 2014 meeting that the best location for the RMSO is in Fargo. The local arrangements committee is Mr. Dale, Mr. Paustian, Mr. Sletten, and Mr. Peterson.

Donations to organizations are in the budget.

The donations for 2015 will be as follows: WRF (AWWARF), \$250; Gateway to Science, \$1,000; Dakota Science, \$150, North Dakota Science Center \$750.

Drinking Water Week is the May 3rd to May 9th 2015. The Mr. Wavra and Mr. Wellman will arrange a Governor Proclamation signing photo and a press release. The Section will not place an advertisement in state newspapers this year.

Mr. Bruschwein regretfully submitted his resignation as Secretary/Treasurer as of the end of the May 2015 Board Meeting. His current workload no longer allows him to give the time to the position that it deserves. He is willing to stay on as an Assistant Secretary/Treasurer.

Mr. Sletten informed the Board that the Poster Competition winner won both the North Dakota and Minnesota competitions and is planning to represent Minnesota. Therefore the committee is looking at sending the second place winner to represent the North Dakota.

Mr. Wavra motioned to adjourn. Mr. Sorenson seconded. The meeting adjourned at 9:50 a.m.

Respectfully submitted,  
David Bruschwein  
Secretary- Treasurer

# Well Disinfection Fact Sheet

*North Dakota Department of Health*

A water well can become contaminated during construction or repair. Flooding also can contaminate a well. Contamination may be bacterial, chemical or both. For bacterial contamination (no chemical contamination suspected), the simplest and most effective way to destroy harmful bacteria in a well and plumbing is disinfection with a chlorine solution. Before disinfecting, the well should first be pumped to remove as much contaminated water as possible. After pumping, the well can be treated with a chlorine solution. The effectiveness of disinfection depends on the concentration of disinfectant, the time it is allowed to remain in the water, well construction and overall water quality. Follow the procedure below to ensure effective disinfection.

If chemical contamination is suspected, contact your local public health unit or the North Dakota Department of Health for sampling and testing advice. This would apply, for example, if your well water has an uncharacteristic and strong chemical taste and/or odor. If you suspect a problem with a specific chemical, analysis can be targeted toward that chemical. Do not drink the water until it is determined to be biologically and chemically safe.

## Procedure for Disinfecting a Well:

1. Before you start, you need to know (a) the diameter of your well casing pipe, (b) the depth to water in your well, and (c) the total depth of your well. This information should be noted on your well driller's log if it is available. If not, measure the diameter of the well casing pipe, the depth to the top of the water in your well and the total depth of your well. Subtract the depth to the top of the water from the total depth of your well to get the length of the water column in your well. Once you know the length of the water column in the well and the casing pipe diameter, use the table provided in this fact sheet to determine how much chlorine you need for every 10 feet of water in your well. Measure enough disinfectant for every 10 feet of water in your well and add it to 5 gallons of water in a bucket. You can find chlorine at most grocery stores in the form of laundry bleach (with no artificial scents), sold under such trade names as Hilex, Clorox and Purex. Sixty-five percent calcium hypochlorite powder or tablets are available from water treatment or swimming pool companies.

2. Pour the chlorine and water mixture into the well casing pipe. If you are repairing or constructing a well, chlorine should be added just before you install the pumping equipment.

3. Bacteria are destroyed when they come into contact with chlorine. Agitate the water in the well to ensure thorough mixing. To do this, turn on your outside faucet. Using a hose, rinse down the inside of the well casing until you can smell the chlorine in the water coming out of the hose. If you have a deep well with a high water level, you may need to add chlorine through a hose inserted down the well casing pipe. You may also drop calcium hypochlorite tablets down the well casing pipe to ensure proper mixing.

4. The tanks, pipes and fixtures in your water system should be disinfected at the same time as the well. Open all faucets and let the water run until chlorine can be smelled at each faucet. Turn off all faucets.

5. Allow the chlorine solution to remain in the well and piping system for 12 to 24 hours. Before drinking the water or using the well, pump the well and run all faucets until you can no longer smell chlorine. To prevent hydraulic overload, do not discharge large volumes of chlorinated water to your septic system. In addition, do not discharge the water onto delicate plants or lawns, as chlorine will kill vegetation.

6. When time does not permit well disinfection by this procedure, you can superchlorinate the well by using four times the amount of chlorine listed on the table. Allow the chlorine solution to remain in the well and piping system for at least two hours. Pump the well and run all faucets to remove any trace of chlorine. For assistance in disinfecting your well, call a certified well driller, your local public health unit or the North Dakota Department of Health. Proper well construction is critical to the safety of drinking water. If your well is not properly sealed and protected, it can become contaminated at any time.

### Procedure for Laboratory Testing:

After flushing your drinking water system to remove all chlorine, a water sample should be submitted to a laboratory for bacteriological analysis. Special sample containers for this test are available from the laboratory. If the test shows that harmful bacteria are still present in the water, chlorination should be repeated. Do not drink the water until you get a test result showing the water is free from harmful bacteria.

# North Dakota Water Environment Association Executive Committee Meeting

*May 19, 2015 Bismarck, ND*

The Executive Committee for the North Dakota Water Environment Association (NDWEA) met at the Ramkota Inn in Bismarck on May 19, 2015. Present were President-Elect Gary Zuroff, Vice President Michael Quamme, Past President Wei Lin, Past President and Delegate Karla Olson, Professional Wastewater Operators representative Don Wald, Secretary-Treasurer Bill Gefroh, and NDWEA Operations and Safety Committee member Wayne Offerdahl. Also attending were NDWEA member Seth Lynne and guest Larry Anderson.

President-Elect Gary Zuroff called the meeting to order at 11:57 a.m. President-Elect Zuroff requested a motion to dispense with the reading and approval of the minutes from the January 21, 2015 meeting as distributed to the Executive Committee members. Karla Olson so moved. Michael Quamme seconded the motion and the motion passed.

Bill Gefroh presented the Treasurer's Report, which reviewed in detail the receipts and expenses from January 1, 2015 through April 30, 2015. The NDWEA net worth as recorded in the report was \$11,272.85 as compared to \$8,291.33 last year at this time. President-Elect Zuroff requested a motion to approve the report as presented. Karla Olson so moved. Wei Lin seconded the motion and the motion passed. Current membership is at 130.

## Old Business:

Potential topics and presenters were discussed for the 2015 North Dakota Water and Pollution Control Conference (NDWPCC) that will be held in Bismarck, October 6 – 8, 2015 at the Ramkota Inn. The list of topics and presenters generated will be submitted to the NDWPCC Secretary-Treasurer for follow-up presenter commitment to present at the 2015 conference.

The NDWEA would like to thank Seth Lynne and Don Tucker for being judges at the 65th Annual North Dakota State Science & Engineering Fair (NDSSEF) at Grand Forks on March 27, 2015. The best water quality project for the junior division was Jack Zorn, with Griggs County Central School District, project title "Drain Pain: What is the Bacon Grease Doing". The best water quality project for the senior division was Lakin Mauch with Hankinson School District, project

title "An Assessment of Drainage Systems in Richland County Corn Fields". The NDWEA Stockholm Junior Water Prize (SJWP) winner was Desa Sand with Ellendale High School, project title "Grazing For Rain". Desa Sand will compete at the national SJWP event on June 19-20, 2015 at Herndon, Virginia.

NDWEA received thank you letters were received by the Gateway to Science, River Keepers, Water Environment Research Foundation, NDSEF and Lakin Mauch for monetary support in 2015.

## New Business:

The North Dakota State University (NDSU) Student Chapter plans on sending twelve students to the 2015 Water Environment Federation Technical Exposition Conference (WEFTEC) in Chicago on October 26 - 30, 2015 to participate and support the NDSU Student Chapter in the WEFTEC Student Design Competition.

There was a discussion held on how NDWEA could help to defray costs for an executive committee member to attend WEFTEC by paying for their WEFTEC registration fee. When budgeted funds are not used for an executive committee member(s) to attend a Water Environment Federation Member Association Exchange meeting, also called WEFMAX, then the following year those funds can be used by one or two executive committee member(s) to help pay for their WEFTEC registration. The amount budgeted was up to \$1,000 in total. Karla Olson made a motion to approve this funding, it was seconded by Wei Lin and the motion carried.

With no further business, President-Elect Gary Zuroff adjourned the meeting at 1:10 p.m.

Respectfully submitted,  
Bill Gefroh  
NDWEA Secretary-Treasurer

**You need a specialized  
water solution.

# Is Your Utility Prepared to Fight Misinformation on Social Media?

by: Heather Syverson, AE2S Communications Coordinator

Many utilities, municipalities, and businesses successfully use Facebook, Twitter, Instagram, YouTube, and other social media channels to connect and share information with their customers. When used to augment the more traditional public information methods, social media can be one of the fastest and most efficient ways to provide information to the public. A Pew Research Center study found that nearly one third of adults in the U.S. get at least some of their news from Facebook.

“Traditionally, utility companies have provided important information through scripted press releases. Traditional public information channels are still important, but utility companies should also build a social media presence on which they can communicate in modern, effective, and personal ways. It’s no longer sufficient to just ‘push out’ information to the public. Information needs to become part of an ongoing conversation with the consumer, and social media is a perfect channel for that,” says Daron Selvig, AE2S Communications Specialist.

One of the greatest benefits of going social is the ability to immediately share information on your own terms rather than waiting for traditional media outlets to broadcast your message. In fact, many savvy reporters follow businesses, utilities, and local government on social media because it’s such a convenient way to receive information and news tips. “Social media has moved beyond the point of being an afterthought or a luxury for maintaining good relations with customers and the public. It has evolved into a mainstream channel of communication,” says Selvig.

Unfortunately, rumors and misinformation can spread just as quickly as legitimate news. Just a few “tweets” or “shares” can kick the rumor mill into high gear, which can snowball into calls and emails from concerned citizens. For instance, during the peak of the Ebola scare in late 2014, false information spread on social media that the outbreak had reached Iowa. The Iowa Department of Public Health acted quickly and released an official statement to shut down the misinformation.

Here are some tips for combating misinformation online:

1. **Monitor Your Accounts:** It’s not enough to just set up a Facebook page or Twitter account. At least one person should be designated to check the utility’s accounts on a daily basis. The same person should be responsible for posting information and responding to posts. Employees who have their own social media accounts should also be encouraged to report misinformation or complaints that they spot online.
2. **Get Ready:** Identify worst case scenarios that could negatively affect your agency - water contamination, responses to rate changes, watermain breaks, flooding or storm damage, etc. Create general guidelines for how the utility will respond.
3. **#HotTopics:** Be aware of what is going on in the news, your community, and your business. Hashtags are an easy way to search for specific topics on Facebook, Twitter, and Instagram. For instance, after an oil spill in Glendive, MT, many people used #OilSpill in their Facebook posts and tweets. Flood fighters in Fargo, ND have shared photos and information about flood conditions with #FargoFlood. Similarly, #MSPstorm was used after a powerful wind storm in Minneapolis. You can search specific hashtags on individual social media sites or use a website like TagBoard.com to simultaneously search multiple social media sites.
4. **Don’t Delay:** During emergencies such as water contamination, uncertainty can spur people to find other sources of information about the situation. The longer an organization waits to respond, an increasing number of rumors will fill the gaps left by official channels of information such as your social media accounts.
5. **Be Clear:** Instead of saying “Mandatory water conservation measures could be in place for several days,” it’s better to say, “Mandatory water conservation measures will be in place for as many as \_\_\_ days. Until further notice, please limit water usage to essential use only.” The second message conveys a timeframe that customers can expect to be impacted along with specific instructions.

6. Consider Visuals: Be open to using infographics, photos, and videos to share information. An infographic could be the perfect way to explain what “essential use” means when water conservation is necessary. And simple cell phone photos or videos can be used to quickly clear up misinformation. As an example, let’s say there are complaints that the public works department isn’t fixing potholes in a timely manner. Posting or tweeting a photo of crews working on the problem can immediately convey the truth.

If you have questions about social media, contact Daron Selvig, AE2S’ social media guru. The AE2S Communications team is comprised of professionals experienced in public information, crisis communication, video production, and social media as well as web and graphic design experts to serve a variety of clients and their projects.

## **ALTERNATIVES TO RIP RAP**

Brock White is your source for new and innovative alternatives to Rip Rap to protect against erosion along shorelines, slopes, and anywhere where sediment is moved by water runoff.

### **FLEXAMAT**

Flexamat consists of concrete shapes that are tied together with high strength geogrid, which enables vegetation to be established while remaining a permanent erosion control solution. Flexamat is capable of handling high flow water runoff. For more information, visit [www.BrockWhite.com/Flexamat](http://www.BrockWhite.com/Flexamat).

### **SCOURSTOP™**

The ScourStop transition mat is designed with voids throughout the structure that allows vegetation growth while providing mechanical protection over highly erosive areas. Scourstop provides protection against much higher shear stress and velocities than rock rip rap. For more information, visit [www.BrockWhite.com/Scourstop](http://www.BrockWhite.com/Scourstop).

### **TURF REINFORCEMENT MATS**

Brock White offers a variety of Turf Reinforcement Mats to stabilize erosive areas. We provide TRM's for both short-term and permanent erosion control, as well as High Performance TRM's for the most demanding erosion control applications.

# 55<sup>th</sup> Annual Water and Wastewater Operator Training Program

by Craig Bartholomay, North Dakota Department of Health

This past March and April, the North Dakota Department of Health, the North Dakota Water and Pollution Control Conference, the North Dakota Section of the American Water Works Association, the North Dakota Chapter of the American Public Works Association, and the North Dakota Water Environment Association sponsored the 55th Annual Water and Wastewater Operator Training Program.

There were six sessions offered with a total of 334 attendants.\* Water treatment and distribution classes were offered March 2-4, March 9-11, March 23-25, and March 30-April 1. Wastewater treatment and collection classes were offered April 13-15, and April 20-22.

TRAINING SESSIONS	NUMBER OF ATTENDANTS
Water Treatment and Distribution	
March 2,3,4	59
March 9,10, 11	57
March 23, 24, 25	55
March 30, 31, April 1	60
Wastewater Treatment and Collection	
April 13, 14, 15	51
April 20, 21, 22	52
<b>Total number of attendants:</b>	<b>334</b>
* Some operators attended more than one session	

The objectives for these classes are to fulfill the continuing education credit (CEC) requirement for certified operators, to hear presentations regarding regulations and how to avoid mistakes that can lead to noncompliance, to learn general operation and maintenance topics, and to give operators an opportunity to write a certification exam. The courses are not geared specifically to prepare operators for certification exams.

During the training classes, there were six operator examination sessions scheduled. These were reserved for the last day of each session. The Department administered 265 examinations this year, with a passage rate of 75%.

EXAMINATION SESSION	NUMBER OF EXAMINATIONS WRITTEN
March 4	44
March 11	39
March 25	48
April 1	50
April 15	39
April 22	45
<b>Total number of examinations written:</b>	<b>265</b>

The following is a breakdown of the certification examinations that were written during the 2015 operator training sessions:

EXAMINATION CLASSIFICATION	IA	I	II	III	IV	TOTALS
Water Treatment	14	29	14	2	3	62
Water Distribution	36	48	16	6	2	108
Wastewater Treatment	7	18	5	4	2	36
Wastewater Collection	21	28	4	5	1	59
<b>TOTALS:</b>	<b>78</b>	<b>123</b>	<b>39</b>	<b>17</b>	<b>8</b>	<b>265</b>

**Water supply and treatment,  
wastewater collection and treatment,  
municipal engineering, water resources  
engineering, land surveying and mapping.**

The Young Professional of the Year Award was established to recognize the contributions of a young professional in the state of North Dakota whose service and achievements are exceptional for their years of service. The award is given annually by the North Dakota Young Professionals Committee (NDWYP) to one young professional member of an organization active in the North Dakota Water and Pollution Control Conference (NDWPCC).

#### **Eligibility Requirements for Nomination:**

- A member in good standing with their respective organization's member association (NASECA ND, NDAWWA, NDAPWA, and/or NDWEA).
- Less than 35 years of age or less than 10 years of experience in the industry at the time of the state conference.
- Demonstrated commitment to the organization by participation in professional meetings, committees, events, and activities.
- Positive service to the community and profession by way of good fellowship, leadership, and commitment.

To obtain an application form please contact Qigang Chang, NDWYP Chair at [Qigang.Chang@AE2S.com](mailto:Qigang.Chang@AE2S.com). Applications are due by 5:00 PM Friday, September 4th so be sure to get them in early.

## ELEMENTS OF YOUR SUCCESS

**Vision. Value. Passion. Integrity. Relationships. Attitude.**

These elements make up the structure of AE2S. What does that mean to you? Extreme client service, trusted relationships, a shared vision for your future, and passion for every project. They all translate into your success.

# Summer Operator Testing Scheduled

The summer operator certification exam session will be held on August 4th & 5th, 2015 at the Environmental Training Center located at 2639 East Main Avenue in Bismarck. Examination times will be from 8:00 a.m. to 4:00 p.m. **To ensure adequate time for exams, testing must begin by 11:00 a.m.** Please indicate time of arrival on exam application form. If you don't have a copy of the application, you can print one by visiting: [http://www.ndhealth.gov/mf/forms/Operator\\_Certification\\_Application.pdf](http://www.ndhealth.gov/mf/forms/Operator_Certification_Application.pdf).

Renewal and exam fees must be paid prior to testing.

Applications must be received by JULY 17, 2015.

Please contact Craig Bartholomay, North Dakota Department of Health, at 701-328-6626 with any questions regarding operator certification and/or exams.

NORTH DAKOTA WATER AND POLLUTION CONTROL CONFERENCE

## Upcoming Conference Dates:

**2015 - Bismarck**, October 6, 7 and 8 Ramkota Hotel

**2016 - Minot**, October 11, 12 and 13 Holiday Inn Riverside

**2017 - Fargo**, October 17, 18 and 19 Holiday Inn

**moore**  
engineering, inc.

**Consulting Engineering  
Land Surveying**

West Fargo, ND

Minot, ND

Fergus Falls, MN

**Engineering  
America**

A 100% Employee-Owned Company

# From Concept & Construction To Completion & Beyond

## Engineering America Provides a One-Source Solution For Your Unique Storage Tank Application.

Our bolted tank design is the preferred dependable, versatile and cost-effective choice in wastewater treatment storage. Single-use applications range from stormwater runoff storage, equalization and trickling filters to sludge storage/mixing.

We've been building our tanks in North Dakota since 1980.

We know the state of North Dakota and the state of North Dakota knows us.

Dickinson, North Dakota  
(2) Aquastore Glass-Fused-to-Steel  
Application: Sludge Storage  
Capacity: 2 Million Gallons  
Size: 120 ft. Diameter x 28 ft. Height  
Installed: 2014  
Installed by Engineering America

Multi-step Manufacturing Process | Engineering Integrity | Industry-Best Warranty | Our Own Crews  
647 Hale Ave. N. Oakdale, MN 55128 | 651.777.4041 | [www.EngAmerica.com](http://www.EngAmerica.com)  
America's Employee-Owned Leader in Liquid Storage Tank Solutions

#### POTABLE WATER MIXING

Reduce stratification, improve residual, prevent ice buildup  
Concord, Massachusetts

#### POTABLE WATER THM REMOVAL

Achieve compliance  
York, New York

#### WASTEWATER

Reduce energy cost, improve nutrient removal, achieve compliance  
St. Helens, Oregon

#### LAKES AND RAW WATER

Reduce WTP operating costs, control algae, increase hypolimnetic oxygenation  
Pagosa Springs, Colorado

## Water professionals agree.

### Medora Corporation helps solve water quality problems and save money.

From California to New York, water operators and engineers trust Medora Corporation to help reduce operating costs and achieve better compliance in their potable water systems, wastewater lagoons and lakes. They depend on our electric, solar and air-powered systems for fast, reliable results. And that's just the beginning. Year after year, our customer support and long-term product performance ensure complete satisfaction.
