

6.8 Commercial Feedlots

6.8.1 Purpose

These regulations are designed to allow commercial feedlots for feeding of livestock, fur bearers and poultry at the same time protect the adjoining uses against odor, run off and other incompatible characteristics associated with feedlots.

6.8.2 General Requirement

6.8.2.1 All feedlots as defined by these regulations are only permitted as conditional uses subject to the provisions of Section 8.2 and the requirements of the North Dakota Health Department.

6.8.2.2 All feedlots shall be designed and constructed with all reasonable preventive measures to avoid surface run-off including construction of sealed collection and retention ponds.

6.8.2.3 Where appropriate, there shall be sufficient drainage to avoid pollution of the ground water from the standing effluents.

6.8.2.4 Feedlots shall not be placed in the floodplains.

6.8.2.5 The applicant, as a part of site approval application shall submit a plan for removal and disposal of the liquid and solid waste generated by the feed lot.

6.8.2.6 No feed lot shall be located nearer than the distance set by the township board or supervisor from a residential development in the unincorporated area or corporate limits of a town.

ARTICLE 7 ADMINISTRATION AND ENFORCEMENT

7.1 Organization

To administer these regulations the following bodies are hereby vested with authority to act in behalf of the Township.

- (1) The Code Administrator
- (2) The Zoning Commission

7.2 The Code Administrator

The Code Administrator is a duly appointed township official authorized by the Board of Supervisors and is responsible to administer Zoning Regulations, to assist the Zoning Commission, and the Board of Supervisors on any matter related to planning for and development of the township.
