

ND Department of Health
Nutrient Reduction Actions and Strategies stakeholder meeting

Meeting goal/outcome is to generate specific actions and strategies to reduce nutrient pollution.

Tuesday May 1 - Fargo-Fargodome meeting room #203

Thursday May 3 - Mandan- Baymont Inn

10:00 AM- Welcome & Introductions

10:15- Background information and highlight the components of the strategy-

11:45- Explanation of afternoon's work- Participants are being asked to provide specific nutrient reduction actions and strategies organized around four specific nutrient source categories: Storm Water Point Sources, Animal Feeding Operations (AFOs)/ Confined Animal Feeding Operations (CAFOs), Private Sewage Disposal Systems, and Agricultural Nonpoint Sources.

Noon-1:30 - LUNCH (on your own)

1:30-2- Self-select a nutrient source category work on (Storm Water Point Sources, Animal Feeding Operations [AFOs]/ Confined Animal Feeding Operations [CAFOs], Private Sewage Disposal Systems, and Agricultural Nonpoint Sources]. Small group work and action development. Groups will be given approximately 20-25 minutes.

2-2:30- Report out to large group. After each group reports out individuals will have the opportunity to add additional actions and strategies to other work groups.

2:30-3:00- Participants will return to original working groups and vote on the top 4 actions/strategies that should be given immediate attention.

3-3:15- Groups will report out one more time on the prioritized actions and strategies.

3:15- Wrap up and Next steps
