Long Lake

National Wildlife Refuge

Water Quality Monitoring at Long Lake National Wildlife Refuge, North Dakota: 2008–2012

**USGS, Northern Prairie Wildlife
Research Center**

Prepared in cooperation with the U.S. Fish and Wildlife Service and
North Dakota Department of Health

Assessment of Water-Quality Data from Long Lake National Wildlife Refuge, North Dakota—2008 Through 2012

Scientific Investigations Report 2013–5183

U.S. Department of the Interior
U.S. Geological Survey

**Available online from the USGS publications warehouse:
<http://pubs.usgs.gov/sir/2013/5183/>**

Partners

- **USFWS**, LLNWR staff
- **ND Dept. of Health**, Mike Ell
- **USGS Northern Prairie Wildlife Research Center**, Ray Finocchiaro, Charlie Dahl, Brian Tangen, Robert Gleason
- **USGS ND Water Science Center**, Steve Robinson, Bill Damschen

Background

- **Biologic assessment / CCP**
- Potential water-quality issues
- Evaporates and chemicals
- Impact to plants, aquatic invertebrates, and birds
- Research, inventory, and monitoring

Monitoring program

- USGS, USFWS, NDDH
- Initiated in 2008
- Goals:
 - Protocol
 - Baseline data
 - Identify potential water quality issues
 - Support management decisions

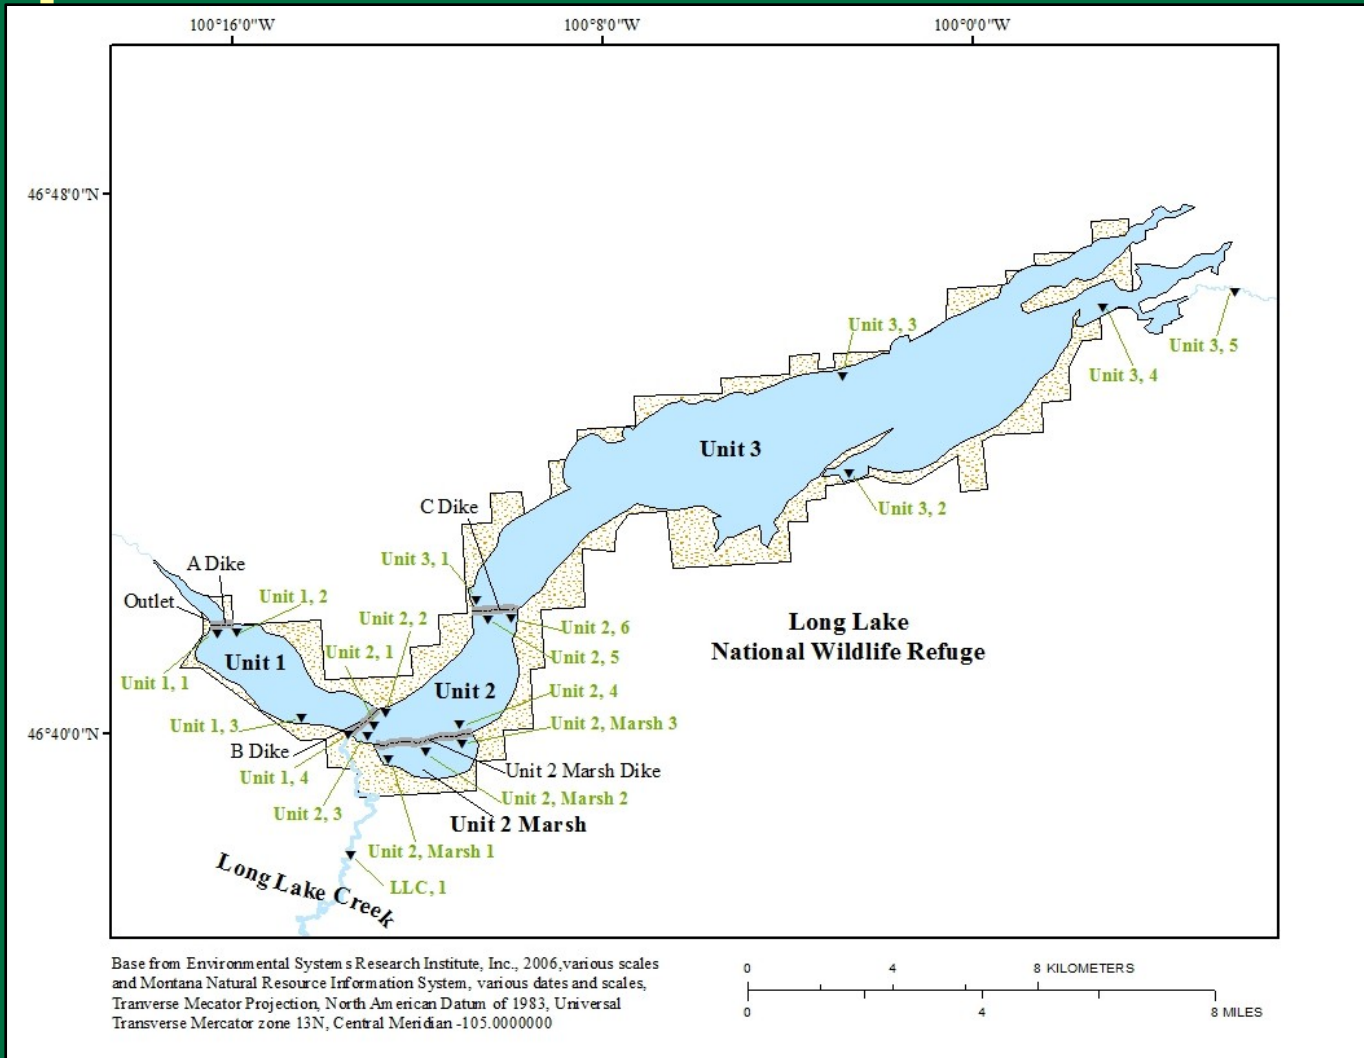

Water quality data

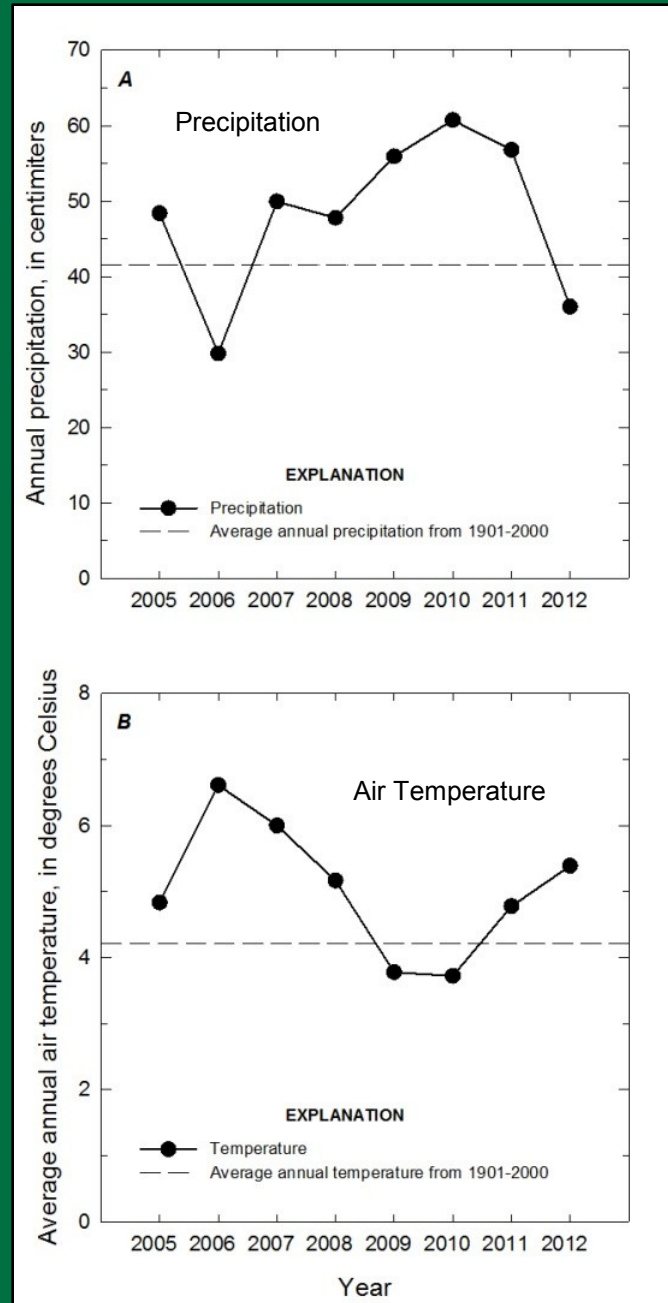

- Bi-monthly samples
 - Hand-held
 - Water samples
 - Major ions
 - Nutrients
 - Elements
 - SC / pH
- Automated loggers
 - Specific conductance
 - Water level

Sample locations

Setting: precipitation/temp

Setting: inflow/outflow

Year	Date range	n	Inflow, cfs	Outflow, cfs	Difference, cfs
2008	June 19—Oct. 17	107	8.48	0.00	-8.48
2009	June 18—Nov. 18	154	110.37	28.55	-81.82
2010	April 23—Nov. 19	211	59.91	94.42	34.51
2011	May 11—Oct. 26	169	143.72	193.63	49.91
2012	April 4—Nov. 13	223	18.53	31.18	12.66

Long Lake NWR, 2005–2009

2005

Photos provided by USFWS: ~August-September

Sampling Season

Year	Date		Number of sites	Sample periods
	Start	End		
2008	July 1	Nov. 5	12	5–9
2009	April 2	Nov. 17	18	12–15
2010	Mar 23	Nov. 18	18	15–25
2011	April 28	Nov. 15	18	14–18
2012	April 2	Nov. 1	19	9–15

Results

- Ions
- Elements
- Nutrients
- Temporal trends
- Spatial variation

Ions

Salinity, etc.

Specific conductance

- 2,400 $\mu\text{S}/\text{cm}$ (<204–38,700)

TDS

- 1,755 mg/L (117–39,700)

Hardness

- 329 mg/L = very hard

Alkalinity

- 580 mg/L = alkaline

SAR

- 10

pH

- 8.8

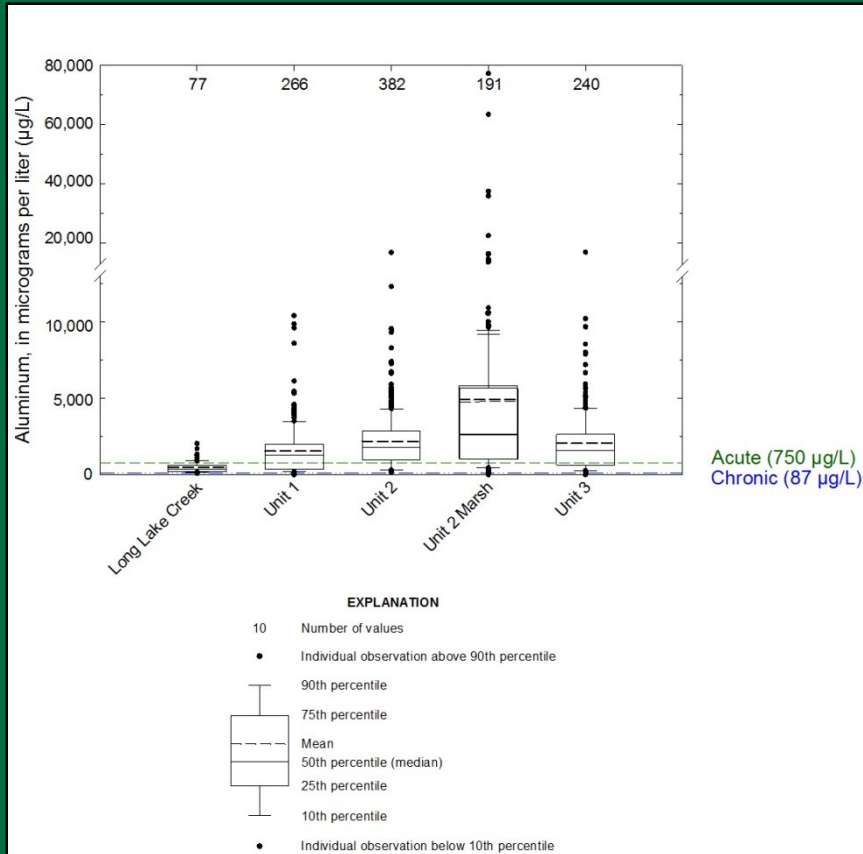

Elements

- Ag, Al, As, B, Ba, Cr, Cu, Fe, Mn, Ni, Pb, Sb, Se, Zn
- WQ standards
 - Acute, chronic, HH, max
 - 12/14
- Al: 70 & 100%
- Cu: 6 & 20%

Al & Cu

Nutrients

- Total N
- $\text{NH}_4\text{-N}$
- $\text{NO}_3\text{+NO}_2$
- Total P
- TKN

Temporal trends

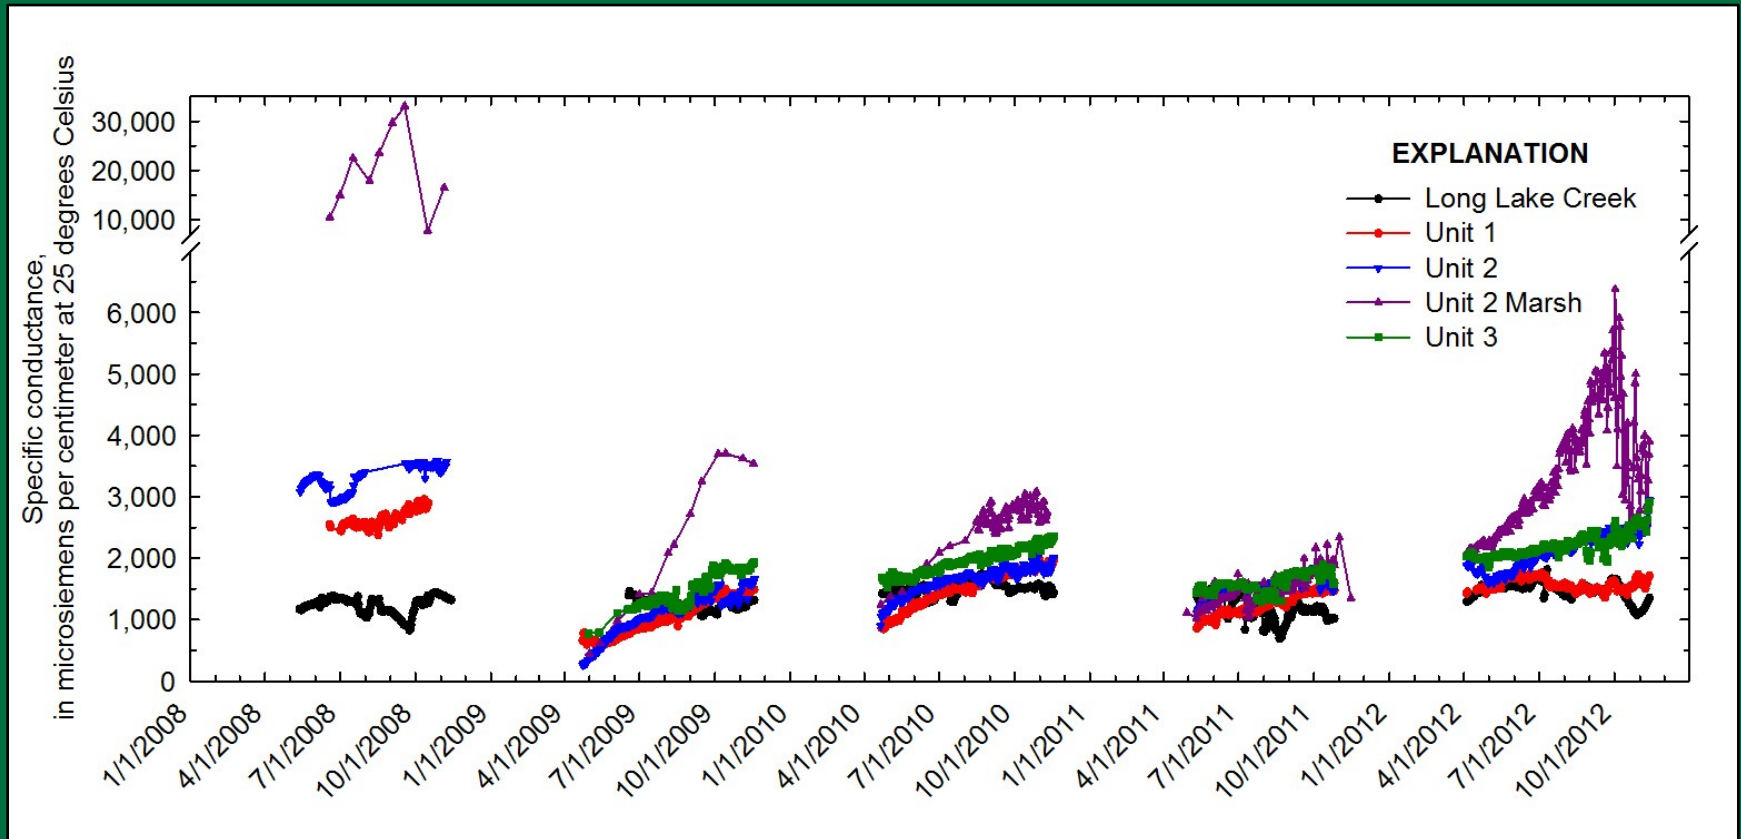

- Yearly
- Seasonal
- *In situ* loggers
 - Specific conductance
 - Water levels
- Salt import/export
- Concentration/dilution

Interannual trends

Specific conductance

Seasonal trends

Inflows

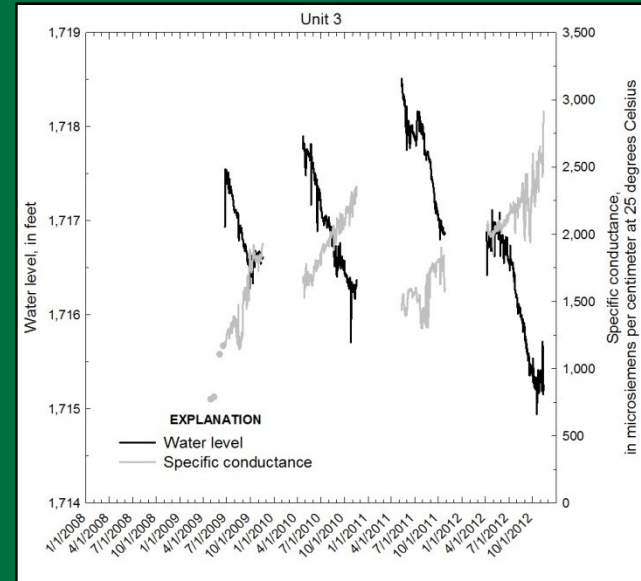

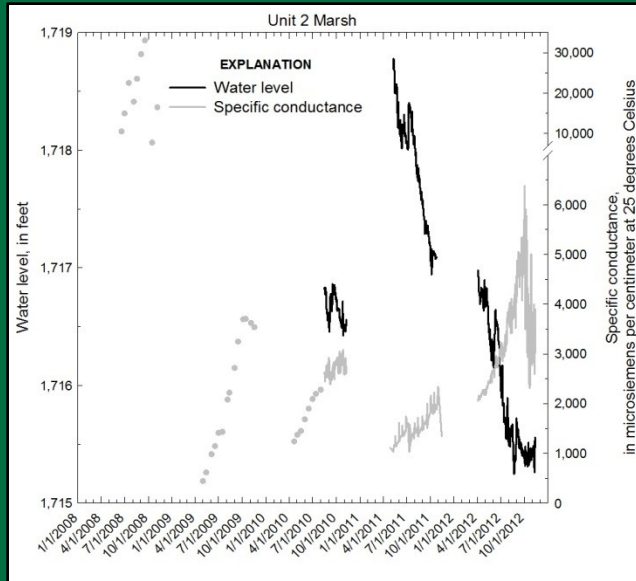

ET

Precipitation/runoff

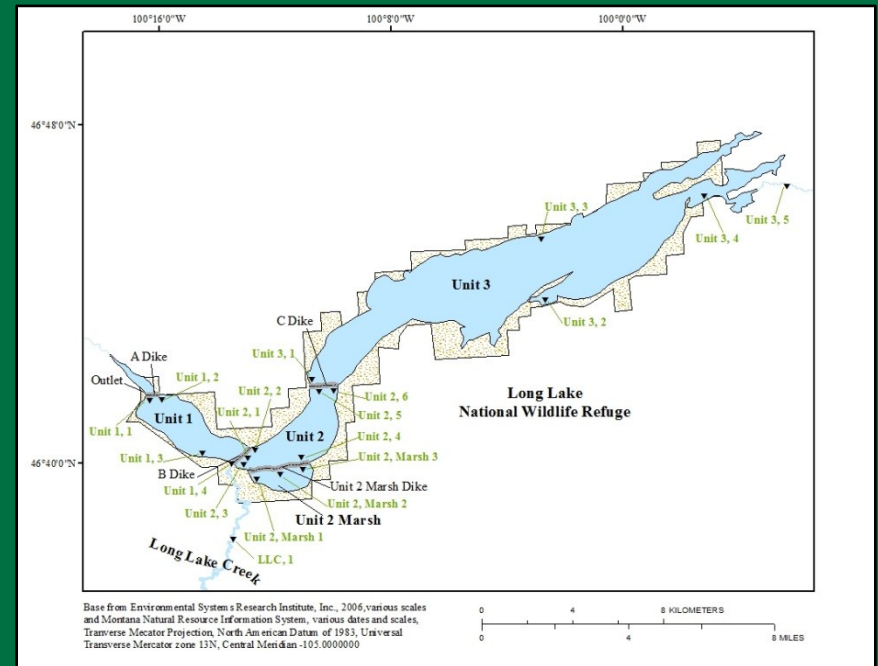

Outflows

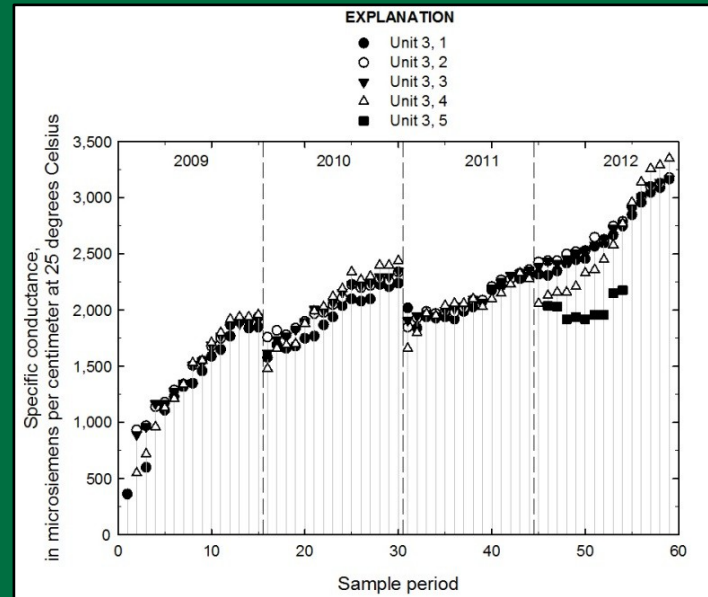

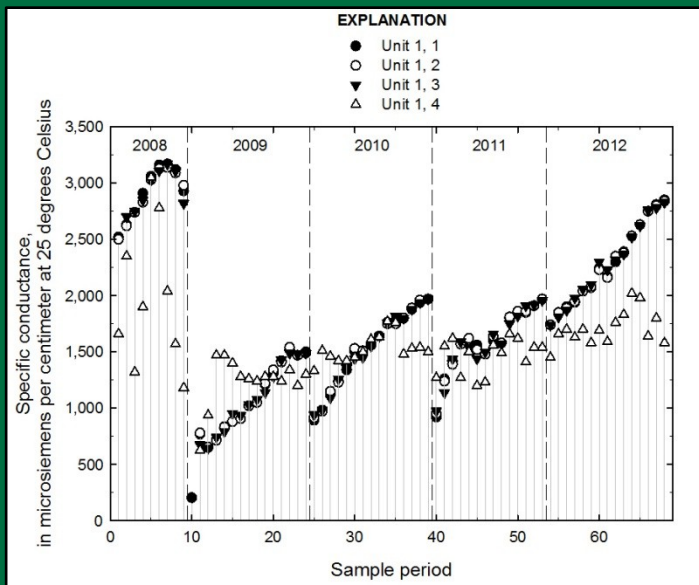

Among-unit variability

- Compare sites by Unit & date
- How well are units mixed?
- Can we modify study design?

Future Monitoring

- **2013**
 - 1 sample site per unit
 - 2 in Unit 2 Marsh
 - 1 sample site Long Lake Creek
 - 1 time per month
- **With limited time and resources**
 - Seasonal (e.g., spring, summer, fall)

Summary

- **Assess the state of the system**
 - No major issues identified
 - High salinity during low water levels
- **Identify noteworthy trends**
- **Establish baselines**
 - Valid comparisons
- **Provide information to support management decisions**

Moving forward

- Continue monitoring
- Examine trends
- Additional data?
 - Soils
 - Biotic communities
- Evaluate management goals / objectives
- Modeling?
 - Water balance information
