

---

The North Dakota Department of Environmental Quality, Division of Waste Management, plans to reissue a permit to:

Dakota Gasification Company- Great Plains Synfuels Plant  
420 County Rd 26  
Beulah, ND 58523

The Dakota Gasification Company- Great Plains Synfuels Plant (the Facility) is a coal conversion facility that generates hazardous waste through the coal gasification process. The Facility stores hazardous wastes in containers before shipping the waste out of state for final treatment/disposal.

Those wishing to provide comments, or request a hearing, on the proposed permit should notify the North Dakota Department of Environmental Quality, in writing, no later than July 2, 2026. Comments should be sent to:

Robin Beyer, Manager  
North Dakota Department of Environmental Quality  
Division of Waste Management – Hazardous Waste Program  
4201 Normandy Street  
Bismarck, ND 58503-1324

The Draft Permit and background documents may be reviewed at the North Dakota Department of Environmental Quality at the address listed above and the Division of Waste Management's website:

<http://www.deq.nd.gov/wn-i/PublicNotices/>

The Draft Permit and background documents are also located at the Beulah Public Library, Reference Desk, 120 Central Ave N, in Beulah, ND.

For additional information or special accommodations, please contact the North Dakota Department of Environmental Quality Hazardous Waste Program at 701-328-5166 or by email at [hazardouswaste@nd.gov](mailto:hazardouswaste@nd.gov).
