Dear Mr. Hammersmark and Mr. Rhea:

The North Dakota Department of Environmental Quality (Department), Division of Waste Management, is proposing approval of the Radioactive Materials License and the Solid Waste Management Permit for disposal of Technologically Enhanced Natural Occurring Radioactive Material (TENORM) at Secure Energy Services USA, LLC d/b/a Secure USA, LLC's 13-Mile Landfill located near Williston, ND.

A 30-day public comment period ending on March 7, 2022 was held for a draft version of this license and permit and a public hearing was held on February 23, 2021. Comments were received during the public comment period. A copy of the Department’s response to comments is enclosed for your files and it is also posted on our website: https://deq.nd.gov/wm/PublicNotices/default.aspx.

In addition, before a final license and a final permit may be signed and issued, the following conditions must be met:

1. Approval of financial assurance for the Radioactive Materials License.

Should you have any questions regarding the Radioactive Materials License, please contact David Stradinger at 701-328-6410 or at dstradinger@nd.gov. Should you have any questions regarding the Solid Waste Permit, please contact Diana Trussell at 701-328-5164 or at dtrussell@nd.gov.

Sincerely,

David W. Stradinger, Manager
Radiation and Indoor Air Quality Control Program
Division of Waste Management

Diana A. Trussell, Manager
Solid Waste Program
Division of Waste Management
